Aloha
I am writing in opposition to the Hoapili development this development is slated for a wrong location. The central plain of Oahu is the last of our valuable ag lands. Hawaii is one of the most isolated locations in the world we need to restore our ag lands not develop them. Once you develop it will never go back. Please understand our resources are finite not unlimited we live in an island and cannot continue to develop every last space in one person's lifetime. Think of our future generations and be a good ancestor.
