LAND USE COMMISSION
STATE OF HAWAII

Dear Honorable Commissioners:

SUBJECT: KIHEI HIGH SCHOOL

The Department of Water Supply staff have reviewed the draft environmental impact statement for the subject project. The department is pleased to provide comments to the commission. There is currently no water service moratorium regarding the issuance of water meters in the Central Maui system. The department is currently able to provide potable water service to the high school project. The meter size required for this project will be determined based upon engineering calculations in the course of the Department of Education's application for a building permit.

Our recommendations to the Department of Education appear to be taken into account as follows: We recommend that water conservation measures be employed in connection with the project including low-flow fixtures and other water management techniques. Also, we note that non-potable water system alternatives will be used by the Department of Education for irrigation purposes. We understand the current plan is to develop irrigation water wells on-site or near the site of the high school. We continue to recommend that the Department of Education also evaluate re-use of treated R1 water from the Kihei Wastewater Reclamation facility.

Thank you for your kind attention. We appreciate the opportunity to provide these comments to the Commission.

Sincerely,

A handwritten signature in cursive script that reads "Paul J. Meyer".
