ANNUAL REPORT PURSUANT TO CONDITION NO. 15
OF FINDINGS OF FACT, CONCLUSIONS OF LAW,
AND DECISION AND ORDER DATED APRIL 16, 1991

LAND USE COMMISSION
STATE OF HAWAII
APR 3 3 01 PM '98

A. GENERAL PROGRESS OF THE PROJECT.

The development of the Petitioner's project is proceeding at a satisfactory pace. In the past year, Petitioner completed construction of the mauka portion of access Road "A" which provides access to the old quarry portion of the development. The construction included extension of the 12" water line, 8" sewer line, electric service and telephone service.

B. EFFORTS MADE/PLANNED TOWARD COMPLIANCE WITH THE FOLLOWING CONDITIONS.

1. Petitioner shall ensure that a buffer area along the boundary of the property be constructed to maintain the visual integrity from the Queen Kaahumanu Highway. Petitioner shall further ensure that the proposed light industrial uses be screened from passing motorists, the Kaloko-Honokohau National Historic Park, and the adjacent Kealakehe lands, by landscaping improvements along the petition area's western, northern and southern boundaries. Petitioner shall prepare a plan for a buffer along the southern boundary with the Kealakehe lands, which shall be submitted to and approved by the Housing Finance Development Corporation. Petitioner shall properly maintain the approved landscaping improvements.

EFFORTS MADE/PLANNED:

Petitioner extended electric service to the area of the irrigation well which will make possible installation of the irrigation system as approved by the County of Hawaii. Petitioner will then proceed with planting the required buffer area along the south boundary. Petitioner's neighbor to the south, HFDC, has not proceeded with any development in this area and apparently none is planned in the foreseeable future.

2. Petitioner shall participate in the funding and construction of local and regional transportation improvements on a pro rata basis as determined by the State Department of Transportation.

EFFORTS MADE/PLANNED:

Petitioner has continued to negotiate with HFDC for approval to construct Road "G" across HFDC's property to connect Petitioner's property to Kealakehe Parkway. Petitioner has offered to pay the complete cost of such construction. The HFDC staff recently indicated it would submit the matter to the HFDC Board for decision.

3. Petitioner shall prepare a drainage and erosion control plan and shall fund and construct the necessary drainage improvements to control drainage within the property and to maintain ocean water quality to the satisfaction of the State Department of Health.

EFFORTS MADE/PLANNED:

Petitioner has completed construction of four dry wells on the mauka portion of Road "A" and will complete the makai portion of Road "A" and additional dry wells in the coming year.

4. Petitioner shall contribute its pro rata share of the cost to develop and distribute water to Petitioner's proposed project, together with other public and private property owners in the area.

EFFORTS MADE/PLANNED:

Petitioner has completed the 12" water distribution system for the mauka portion of Road "A" and plans to complete the makai portion of the water system in Road "A" in the coming year.

5. Petitioner shall fund and construct the necessary waste-water disposal improvements on the subject property for eventual hook-up to a municipal sewer system as determined by the State Department of Health.

EFFORTS MADE/PLANNED:

Petitioner has completed the 8" sewer collection system for the mauka portion of Road "A" and will complete the makai portion of the sewer system in Road "A" in the coming year.

6. Petitioner shall coordinate with the County of Hawaii and the State Department of Health to establish appropriate systems to contain spills and prevent material associated with light industrial uses, such as petroleum products, chemicals, solvents or other pollutants, from leaking into the storm drainage systems and adversely affecting the groundwater and coastal waters.

EFFORTS MADE/PLANNED:

Petitioner has not yet developed any additional uses that involve chemicals, solvents or other pollutants. West Hawaii Concrete is operating under permit and supervision of the State Department of Health and does control the discharge of any pollutant.

7. Petitioner shall fund its pro rata share for electrical facilities as determined by the Hawaii Electric Light Company (HELCO).

EFFORTS MADE/PLANNED:

Petitioner funded the electrical system in Road "A" with HELCO and the system is now complete.

8. Petitioner shall immediately stop work on the impacted area and contact the State Historic Preservation Office should any archaeological resources such as artifacts, shell, bone, or charcoal deposits, human burial, rock or coral alignments, paving or walls be encountered during the project's development.

EFFORTS MADE/PLANNED:

Petitioner funded a full archaeological inventory and data collection by Paul H. Rosendahl, Ph.D., Inc. No further archaeological resources have been found.

9. Petitioner shall provide its pro rata share for police, fire, park, and solid waste disposal as may be required by and to the satisfaction of the County of Hawaii.

EFFORTS MADE/PLANNED:

No request from the County of Hawaii for payment of Impact Fees. Hawaii County has not yet adopted an Impact Fee Ordinance.

10. The Petitioner shall participate in an air quality monitoring program as specified by the State Department of Health.

EFFORTS MADE/PLANNED:

No discussions with or request from the Department of Health for such a program.

11. The Petitioner shall implement effective soil erosion and dust control measures during all Increments of the development.

EFFORTS MADE/PLANNED:

Petitioner drilled a water well to provide an adequate supply of water for dust control, and the system is now in operation.

12. Petitioner shall develop and maintain on-site facilities to insure that the nearshore, offshore and deep ocean waters remain in pristine condition. Petitioner shall also participate in a water quality monitoring system as may be required by the State Department of Health.

EFFORTS MADE/PLANNED:

Petitioner has not developed any activity that will impact nearshore, offshore or deep ocean waters. Petitioner's operations on the property are substantially unchanged.

13. Petitioner shall develop the property in substantial compliance with representations made to the Commission in obtaining the reclassification of the property. Failure to so develop may result in reclassification of the property to its former land use classification.

EFFORTS MADE/PLANNED:

Petitioner has developed and will continue to develop the subject project in full compliance with the representations made to the Commission.

14. Petitioner shall give notice to the Commission of any intent to sell, lease, assign, place in trust, or otherwise voluntarily alter the ownership interest in the subject property covered by the approved petition, prior to development of the Property.

EFFORTS MADE/PLANNED:

No intent to sell, lease, assign, place in trust or otherwise alter ownership of the subject property.

15. Petitioner shall provide annual reports to the Commission, the Office of State Planning and the County of Hawaii Planning Department in connection with the status of the subject project and the Petitioner's progress in complying with the conditions imposed.

EFFORTS MADE/PLANNED:

This report is to comply with condition no. 15.

16. The Land Use Commission may fully or partially release these conditions as to all or any portion of the Property upon timely motion and upon the provision of adequate assurance of satisfaction of these conditions by Petitioner.

EFFORTS MADE/PLANNED:

No request for full or partial release of conditions.

DATED: Honolulu, Hawaii, April 2, 1998.
