RE: Hokua Place DEIS

Aloha,

We do not support this project under the pretext that it's 769 residences will not impact our horrendous traffic situation or that our schools will only be impacted by an additional 156 students as opposed to approximately 1500. We also cannot support any development of this size in that crowded location and without any required financial contribution toward extra traffic lanes on Kuhio Highway and the Bypass other than a left turn lane to road A. The financial impacts of extra police, fire, and educational personnel also will borne by the public and not the developers which is a large problem.

This 97 acre parcel should be kept in it's current agricultural designation until proper infrastructure is in place prior to development.
