Subject: Olowalu Town Project
Air Quality Study Update

Dear Mr. Frampton:

In accordance with your request, we have reviewed Alternatives 1 and 2 for the subject project as they relate to the air quality study we prepared in October 2011. Both project alternatives will include 1,500 residential units and 300,000 to 375,000 square feet of commercial space, except Alternative 2 reduces the land area by eliminating the lands Makai of Honoapiilani Highway. Because it is anticipated that either alternative would generate about the same volume of motor vehicle traffic, the air quality study prepared in 2011 is applicable to either alternative.

Please call me if you have any questions about this.

Very truly yours,

Barry D. Neal
