Honolulu, Hawaii 96804-2359

LAND USE COMMISSION  
STATE OF HAWAII  
2011 MAR 14 A 9:51

Re: Annual Report of Honua'ula Partners, LLC  
Docket No.: A93-689

Dear Mr. Davidson:

Our law firm represents Honua'ula Partners, LLC ("New Owner"), which purchased the subject property described below from WCPT/GW Land Associates, LLC (the "Successor Petitioner") mentioned in the previous annual reports (2000-2007) to the State Land Use Commission. New Owner, which purchased the subject property on July 24, 2007, is comprised primarily of the same entities as Successor Petitioner.

From July 10, 2000, when Successor Petitioner purchased the subject property from petitioner, Palauea Bay Partners (the "Original Petitioner") to the sale of the subject property in July 2007, Successor Petitioner diligently pursued the entitlements for the subject property which is the subject of the above-referenced docket.

New Owner as successor entitled to the interests of the Successor Petitioner hereby submits this Seventeenth Annual Report to the Land Use Commission of the State of Hawaii (the "LUC") in compliance with Condition 18 of the Findings of Fact, Conclusions of Law, Decision and Order (the "D&O"), entered in the above-referenced docket on September 20, 1994.

**I. Status of the Project.**

**A. Pre – LUC Proceedings by Original Petitioner before Maui County Agencies.**

In or about 1988, Original Petitioner proposed a residential resort development on approximately 670 acres of land situate at Wailea, Maui, Hawaii, bearing Tax Map key numbers 2-1-8:56 and 2-1-8:71 (collectively the “Property”). Original Petitioner’s proposed development of the property included more than 2,000 single and multi-family dwelling units, two (2) 18-hole golf courses, an area combining residential and commercial features (called the Village Mixed Use District), and a neighborhood shopping component (together the “Original Development”).

Original Petitioner obtained from the County of Maui several land use entitlement approvals for the Original Development.

First, in December, 1988, the Planning Commission of the County of Maui (the “Planning Commission”) accepted a final environmental impact statement for the Original Development.

Second, in March, 1992, following review by the Planning Commission and approval by the Council of the County of Maui (the “County Council”), the Mayor of the County of Maui signed into law an ordinance designating the property “Kihei-Makena Project District 9” under the Kihei-Makena Community Plan.

Because of its “Project District” designation under the Kihei-Makena Community Plan, the necessary implementing zoning entitlements include not only an ordinance changing the zoning of the property from agriculture and open space to Kihei-Makena Project District 9, but also a second ordinance which must first be reviewed by the Planning Commission then adopted by the County Council and the Mayor as a part of a three (3) phase project district process. Besides Phase I (the enactment of an ordinance setting forth the permitted land uses, densities, setback, building height and the like), the Project District process requires the adoption of a preliminary site plan (Phase II) by the Planning Commission and the approval of a final site plan (Phase III) by the Director of the Department of Planning of the County of Maui (the “Planning Director”).

Thus, in October, 1992, the Planning Commission reviewed and the County Council and the Mayor approved two (2) ordinances affecting the Property; (a) an ordinance changing the zoning of approximately 402.35 acres of the 670 acres comprising the Property from agriculture and open space to Kihei-Makena Project District 9; and (b) an ordinance granting Phase I approval for two (2) 18-hole golf courses, a clubhouse, and other accessory uses and a six (6) acre park, all proposed by the Original Petitioner on the 402.35 acre portion of the Property that was concurrently zoned Kihei-Makena Project District 9.

The Original Petitioner later obtained from the Planning Commission and the Planning Director, respectively, Phase II and Phase III approvals to those portions of the Property that had been granted Phase I approval. The Original Petitioner also obtained a variety of administrative permits relating to the original development.

**B. Proceedings Before the LUC Brought by Original Petitioner.**

By its D&O, the LUC amended, at the request of the Original Petitioner, the land use district boundaries for the Property by reclassifying its 670 acres from the agriculture district to the Urban District, all in conjunction with the Original Development of more than 2,000 single and multi-family dwelling units, two (2) 18-hole golf courses, a village mixed use area, and a neighborhood shopping component.

**C. Current Proceedings by the Successor Petitioner and New Owner Before Maui County Agencies.**

Successor Petitioner proposed a development substantially reduced in scope from the Original Development, but with the same principal uses (the "Current Development"). New Owner has adopted and is following through with the Current Development which comprises of:

1. Fourteen Hundred (1,400) single and multi-family dwelling units, an almost one-third (1/3) reduction from the more than 2,000 dwelling units in the Original Development.
2. One (1) 18-hole golf course, clubhouse and accessory uses instead of the two (2) 18-hole golf courses proposed by the Original Petitioner.
3. A neighborhood shopping component and a village mixed use area.

To implement the Current Development, Successor Petitioner filed on June 30, 2000, two (2) zoning applications, as later amended, with the Planning Commission (the "Current Applications"):

(a) An application to change the zoning of that portion of the Property not already zoned Kihei-Makena Project District 9 (267.65 acres) from agriculture and open space to Kihei-Makena Project District 9, coupled with a request to eliminate two (2) conditions imposed by the County Council in its approval of the Phase I ordinance in 1992; and

(b) An ordinance for Phase I approval for the Current Development.

On October 30, 2000, the Planning Commission held a public hearing on the Successor Petitioner's two (2) Current Applications, but deferred any decisions on the request. Following further meetings with various community groups and governmental agencies, the Planning Commission decided at its meeting of October 23, 2001, to recommend to the County Council approval of the Current Applications. A copy of the letter from the Maui Planning Department formally notifying Successor Petitioner of the Planning Commission's action on the Current Applications, together with recommended conditions to their approval, was attached to the 2002 annual report.

The Current Applications were before the County Council for its disposition for over seven (7) years. Under the rules of the County Council, action on the Current Applications must first be taken by the Council Land Use Committee (the "CLUC") which has assumed the work left by its predecessors, the 2002-2004 Council Planning and Land Use Committee at the end of 2004.

CLUC scheduled a meeting in Kihei, Maui, for the evening of January 4, 2006 to consider the Current Applications. There was considerable public testimony presented to the CLUC at said meeting about the project, most of which was in support of the Project. The meeting was adjourned without any action taken by the CLUC on the Current Applications.

Subsequent meetings with the CLUC were held on March 15, June 21, July 19, and October 4, 2006 on the Project. In 2007, the CLUC met to discuss the Project on January 31, 2007. At this meeting, the CLUC accepted the June 2005 traffic report for the Project and approved the project district standards ordinance for the project district.

Twenty-six additional meetings were held by the CLUC in 2007 to complete discussion on the Project and approve twenty-eight conditions for the change in zoning ordinance. The County Council passed the project district ordinance and the zoning ordinance with two more conditions on First Reading on February 14, 2008. Second and Final Reading of the two ordinances by the County Counsel occurred on March 18, 2008. Mayor Charmaine Tavares signed the bills on April 8, 2008, enacting into law Ordinance No. 3553, which sets forth the standards for the Kihei-Makena Project District 9 and Ordinance No. 3554, which changes the zoning of the Property to Kihei-Makena Project District 9 (Wailea 670) (collectively, the "2008 Project Ordinances"). Attached to Ordinance No. 3554 is Exhibit "2" which lists thirty (30) conditions of zoning that were accepted by the New Owner by way of a Unilateral Agreement dated February 18, 2008 and recorded in the Bureau of Conveyances, State of Hawaii as Document 2008-036711. Ordinance No. 3553 and No. 3554 were sent with last year's annual report to the State Land Use Commission as Exhibit "1" and Exhibit "2", respectively.

Subsequent to the enactment of the change in zoning and Project District 9 standards ordinances for the Property, a lawsuit titled Daniel K. Kanahele et al v. Maui County Council and County of Maui was filed in the Second Circuit Court by five plaintiffs. A preliminary

injunction was granted initially by the Court preventing New Owner from processing in the county any requests for permits or approvals for the Current Development. New Owner intervened in this case on April 21, 2008. The County and New Owner were successful in having the Court dismiss the lawsuit on November 17, 2008. The ruling of the Second Circuit Court, which was filed on January 22, 2009, was appealed by the plaintiffs on February 2, 2009, to the Intermediate Court of Appeals (the "ICA"), State of Hawaii. Said appeal is pending a decision by the ICA.

Another lawsuit was filed *pro se* by David Mogilefsky in the Second Circuit Court against the County of Maui on May 6, 2008, contending that the County Council should not have approved the change in zoning for the property until an updated Environmental Impact Statement was completed. The County filed a motion for summary judgment which was granted by the Court, dismissing the lawsuit on December 15, 2008. Mr. Mogilefsky filed an appeal to the ICA on December 22, 2008, from the Court's decision. Mogilefsky's appeal was dismissed by the ICA on June 22, 2010 and Mogilefsky's motion for reconsideration was denied by the ICA on July 1, 2010. Mogilefsky then filed a writ of certiorari with the Hawaii Supreme Court (the "Supreme Court") which was rejected by the Supreme Court on August 30, 2010.

Meanwhile, the New Owner began the environmental impact statement ("EIS") process for the Project as approved by the 2008 Project Ordinances. An EIS updating the 1988 EIS will address the environmental and ecological impacts of the revised features of the Project upon current conditions in the Wailea-Makena region.

An EIS Preparation Notice ("EISPN") was published pursuant to established practice and procedure of the Office of Environmental Quality Control ("OEQC") but the EISPN was modified to address a comment about the EISPN. In consultation with OEQC, the New Owner prepared an Environmental Assessment/Environmental Impact Statement Preparation Notice ("EA/EISPN"). Subsequently, the New Owner prepared a draft EIS which was published by the OEQC on April 23, 2010 and reviewed by the Planning Commission on June 22, 2010. A letter by the Department of Planning containing the comments and concerns of the Planning Commission dated June 30, 2010 was sent to the New Owner, which is in the process of responding to said comments and concerns. If the MPC finds that the responses adequately address its comments and concerns, the New Owner will prepare a Final EIS to present to the MPC for acceptance. If the Final EIS is accepted by the MPC, the New Owner will seek Phase II and Phase III approvals for the Project from the Planning Commission and the Planning Director, respectively.

## **II. The New Owner's Response to the LUC Conditions.**

New Owner responds to the conditions imposed by the LUC in the D&O as follows:

**1. Condition #1 of the D&O states:**

“1. Petitioner shall provide affordable housing opportunities for low-low/moderate and gap group residents of the State of Hawaii to the satisfaction of the State Housing Finance and Development Corporation in accordance with the Affordable Housing Guidelines, adopted by the Housing Finance Development Corporation, effective July 1, 1992, with an addendum dated January 1, 1994, and as periodically amended. The location, distribution of the affordable housing or other provisions for affordable housing shall be under such terms as may be mutually agreeable between the petitioner and the State Housing Finance and Development Corporation and the County of Maui, pursuant to Section 19.45.050.A.1 of the Maui County Code.”

**Response:** In response to comments by the Department of Housing and Human Concerns of the County of Maui, the Successor Petitioner agreed to comply with all duly enacted affordable housing requirements of the County of Maui. However, the County Council enacted in December 2006 the Residential Workforce Housing Ordinance, Chapter 2.96, Maui County Code, which established requirements for affordable housing in Maui County. Additionally, Condition #5 of Ordinance No. 3554 specifies the affordable housing requirements for the Project. New Owner is complying with Chapter 2.96 and Ordinance No. 3554 of the Maui County Code.

New Owner understands that the State Housing Finance and Development Corporation has delegated compliance with this requirement to the County of Maui.

**2. Condition #2 of the D&O states:**

“2. Petitioner shall implement effective soil erosion and dust control measures during construction and compliance with the rules and regulations of the State Department of Health and the County of Maui.”

**Response:** New Owner will comply with this condition. In addition, the Department of Health of the State of Hawaii (the “Health Department”) and various agencies of the County of Maui (including its Department of Public Works, formerly known as the Department of Public Works and Environmental Management offered comments to the current applications and New Owner agrees to comply with those comments related to Condition 2.

Also, New Owner shall comply with Condition #14 of Ordinance 3554 which requires nonpotable water or effluent for dust control.

**3. Condition #3 of the D&O states:**

“3. Petitioner shall cooperate with the State Department of Health and the County Department of Public Works and Environmental Management to conform to the

program goals and objectives of the Integrated Solid Waste Management Act, Chapter 342G, Hawaii Revised Statutes.”

**Response:** On June 22, 1993, the Department of Public Works and Waste Management of the County of Maui (the “Public Works Department”) approved the Solid Waste Management Plan for the original development in accordance with the Solid Waste Management Act. New Owner intends to cooperate with the Health Department and the Department of Environmental Management, Solid Waste Division during Phases II and III of the current applications to ensure that the Current Development conforms with the program goals and objectives of the Solid Waste Management Act.

**4. Condition #4 of the D&O states:**

“4. Petitioner shall contribute its pro rata share to fund and construct adequate wastewater treatment, transmission and disposal facilities, as determined by the State Department of Health and the County of Maui Department of Public Works and Environmental Management. When feasible, Petitioner shall contribute its pro-rata share and be required to connect to the County wastewater system and the Petitioner’s temporary Sewage Treatment Plant shall be abandoned and dismantled.”

**Response:** Condition #17 of Ordinance 3554 requires New Owner to provide a private wastewater treatment facility and system for the Project. New Owner will consult with the Department of Environmental Management and the Health Department to review the Current Development during Phase II and Phase III. New Owner fully discussed with the Department of Environmental Management, Wastewater Division (the “DEM”), and the State Department of Health (“DOH”) its compliance with Condition #4 and Condition #17. If necessary, New Owner will seek an amendment to LUC Condition #4 to make it consistent with Condition #17 of Ordinance 3554.

Additionally, Condition #16 of Ordinance 3554 required a Sewer Disposal Study (the “Study”) to be prepared by the New Owner. The Study was prepared and submitted to the DEM, the DOH, the Department of Water Supply (collectively, the “Government Agencies”) and the County Council for review and comment. The Government Agencies acknowledged that the Study satisfied their respective requirements. The County Council accepted the Study and filed it pursuant to its rules on November 29, 2010.

**5. Condition #5 of the D&O states:**

“5. Petitioner shall comply with the environmental health conditions from the State Department of Health, dated January, 1992 (Version 4), and entitled “Twelve (12) Conditions Applicable to all New Golf Course Development.”

**Response:** Original Petitioner obtained final approval from the DOH in July, 1993, to the Integrated Golf Course Management Plan required under the “Twelve (12) Conditions Applicable to all New Golf Course Development.” Condition #18 of Ordinance 3554 also requires New Owner to comply with the DOH’s Twelve Conditions. New Owner intends to comply fully with Condition 5 and Condition #18.

**6. Condition #6 of the D&O states:**

“6. Petitioner shall participate in an air quality monitoring program, under such terms as may be mutually agreeable between the Petitioner and the State Department of Health.”

**Response:** New Owner intends to comply with Condition #6.

**7. Condition #7 of the D&O states:**

“7. Petitioner shall fund and construct adequate civil defense measures, as determined by the State and County of Maui, Civil Defense Agencies.”

**Response:** Condition #23 of Ordinance 3554 incorporates this LUC Condition #7. New Owner intends to comply with Condition #7 and Condition #23.

**8. Condition #8 of the D&O states:**

“8. Pursuant to the agreement with the Department of Education (DOE), Petitioner shall contribute to the development, funding and/or construction of school facilities, by paying \$850.00 per unit (based on 2,000 proposed units) to the DOE as the developer’s school facilities fair share contribution, with 20 percent paid at the time the building permit is obtained, and 80 percent paid, through escrow, at the time of closing on each unit. A quarterly report will be provided to the DOE by developers’ escrow company listing the units sold and total amount of funds transferred to the DOE during that period. No monies paid to the DOE under this condition are to revert to the petitioner or developer.”

**Response:** New Owner intends to comply fully with Condition #8. Successor Petitioner proposed to the State Department of Education (DOE) and the DOE accepted an offer to increase the project contribution from the previously approved \$850 per unit to \$3000 per unit based upon the same payment schedule as previously set forth by the LUC. A letter from DOE to the LUC confirms this offer and the formal agreement setting forth this change in contribution has been accepted by the New Owner. This contribution of \$3000 per unit has been incorporated in Condition #22 of Ordinance No. 3554.

**9. Condition #9 of the D&O states:**

“9. Petitioner shall fund, design and construct its pro rata share of the necessary local and regional roadway improvements necessitated by the proposed development in designs and schedules accepted by the State Department of Transportation and the County of Maui. Petitioner shall revise the traffic study to re-examine the required mitigation measures if the roadway improvements cited and predecessors were not assumed to be place. The revised report shall also specify the improvements the developer will be committed to provide. The petitioner shall contribute its pro-rata share to the traffic improvements, as determined by the State Department of Transportation and the County of Maui.”

**Response:** In conjunction with its Current Applications, Successor Petitioner initially submitted a traffic study for the Current Development. At the request of the Planning Commission, Successor Petitioner submitted a second traffic report in further support of its current applications.

The Successor Petitioner, by agreement with the State Department of Transportation and in coordination with Makena Resort, has paid in excess of \$350,000 for the design of improvements to Piilani Highway from Kilohana Drive north to North Kihei Road. The project was completed and has been in use by the public. Traffic capacity on the highway has been generously increased with a significant reduction in traffic congestion as a result of this effort.

Successor Petitioner has also volunteered to contribute up to \$5,000.00 per dwelling unit for improvements to Maui County’s roadways in the Kihei-Makena Community Plan area.

Also, Condition #2 of Ordinance No. 3554 specifies additional traffic requirements for the Project and Condition #3 incorporates the contribution of \$5,000.00 per unit.

The New Owner is complying with all requirements of SLUC Condition #9 and **Condition #2 and Condition #3** of Ordinance No. 3554. The New Owner has already prepared a draft EA for the widening of Piilani Highway from Kilohana Drive south to Wailea Iki Drive and has filed it with the State Department of Transportation. The draft EA was published by the OEQC on October 23, 2010, and the New Owner is in the process of responding to comments generated by said publication.

**10. Condition #10 of the D&O states:**

“10. Petitioner shall make available adequate golf tee times at affordable rates for public play to State of Hawaii residents.”

**Response:** As noted above, the Original Petitioner proposed two (2) 18-hole golf courses and more than 2,000 single and multi-family dwelling units. Further, because the maximum number of allowable dwelling units for the Project has been reduced from more than 2,000 units to 1,400, the economic success and viability of a markedly less dense project (but with minimal reduction of on and off site infrastructure costs) necessarily requires a variety of amenities to attract prospective purchasers. To fairly balance the benefits of a less dense project against the financial realities of fixed infrastructure requirements, the Current Development now proposes a single 18-hole private golf course as an amenity to and with play limited to homeowners and/or guests at the property.

Lastly, in its review of the Current Application, the Department of Parks and Recreation of the County of Maui commented that it has no objection to the deletion of a substantively identical condition imposed by the County Council in its 1992 approval to the ordinance changing the zoning of 402.35 acres of the Property from agriculture and open space to Kihei-Makena Project District 9. As shown by the transmittal (attached to the 2002 annual report) from the Director of Planning to the Maui County Council, the Planning Commission deleted a condition similar to Condition 10, imposed when the Original Petitioner received Project District approval in 1992 for two (2) 18-hole golf courses. The Planning Commission recommends in the conditions that the Current Petitioner's single 18-hole golf course be made available for fundraising tournaments by non-profit groups and for Maui junior golf programs. Petitioner filed a petition to amend the District Boundary Amendment D&O proposing modifications to Condition 10 that will provide for public play by incorporating both non-profit tournament play, as well as a youth golf program developed by the Successor Petitioner in cooperation with the Maui Junior Golf program. The LUC, in its Order Granting Petitioner's Motion to Amend the Decision and Order of Land Use District Boundary Amendment Docket No. A93-689, on January 21, 2003 approved the Petitioner's request to amend the original Condition 10 to read as follows:

"10. Petitioner shall (a) develop an organized instructional program for junior golfers at its facility, (b) permit Maui Junior Golf the use of the golf course in accordance with Petitioner's instructional program, (c) sponsor one nonprofit organization per quarter, other than Maui Junior Golf, the use of the golf course for a fund-raising activity upon terms mutually agreed upon with said nonprofit organization."

The Department of Parks and Recreation of the County of Maui has determined that Successor Petitioner's compliance with modified terms of Condition #10 is acceptable.

The DPR's letter was submitted by Successor Petitioner in the Twelfth (2006) Annual Report to the Land Use Commission.

However, Condition #12 of Ordinance No. 3554 specifies new requirements for the golf course, among which is public play at the golf course and specified golf rates.

Accordingly, New Owner will discuss the new requirements with the LUC whether an amendment to LUC Condition No. 10 will be required.

**11. Condition #11 of the D&O states:**

“11. Petitioner shall fund and construct its pro rata share for adequate water source, storage, and transmission facilities and improvements to accommodate the proposed project. Water transmission facilities and improvements shall be coordinated and approved by the appropriate State and County agencies.”

**Response:** In 1994, the Original Petitioner drilled two (2) wells on the Property, with and generators installed the next year. Repeated tests of these two (2) wells confirmed that the water is non-potable and is of sufficient quantity to irrigate the golf course and common area landscape.

The Successor Petitioner has been working diligently to address the current shortfall of domestic water supply in Maui County as it relates to the successful approval of the subject project. As stated in the Planning Commission Conditions of approval dated November 30, 2001, the successor must develop a private water system to serve the subject project. In response to this condition, the Successor Petitioner has accomplished both a private water source development agreement and water transmission easement agreements with adjacent private landowners. With these two agreements in place, the Successor Petitioner applied for well drilling permits necessary for development of a private water source system for the subject project.

Further, as a part of the current applications, New Owner intends to provide the County Council, the Department of Water Supply in the County of Maui, and the appropriate agencies of the State of Hawaii with additional information about its proposed potable water system.

Condition #1 of Ordinance 3554 specifies requirements for development of a water source for the Project. The work done thus far by New Owner is in compliance with this ordinance. New Owner will discuss Condition #1 with LUC.

**12. Condition #12 of the D&O states:**

“12. Petitioner shall fund the design and construction of its pro rata share of the drainage improvements required as a result of the development of the property in compliance with appropriate State and County agency requirements.”

**Response:** New Owner intends to comply with Condition #12. Further, various agencies of the County of Maui and the State of Hawaii (including without limitation the

Public Works Department and the Health Department) have offered comment on the current applications and review of the Current Development in Phase II and Phase III.

**13. Condition #13 of the D&O states:**

“13. Petitioner shall contribute its pro rata share to a near shore water quality monitoring program as determined by the State Department of Health and the State Division of Aquatic Resources, Department of Land and Natural Resources.”

**Response:** New Owner intends to comply with Condition 13. Further, the Health Department and the Division of Aquatic Resources of the Department of Land and Natural Resources of the State of Hawaii have reviewed the Current Applications.

Prior to the sale of the subject property, the Successor Petitioner completed a baseline water quality report for the project in advance of any project approvals. The New Owner continues to provide a yearly report to both the Department of Land and Natural Resources and the DOH.

Condition #20 of Ordinance 3554 specifies requirements for marine water quality monitoring. New Owner shall review Condition #20 with LUC.

**14. Condition #14 of the D&O states:**

“14. Prior to filing of an amendment to the Project District Zoning Ordinance for Project District 9, an archeological inventory survey of the southern portion of the Property which was covered with a’a (labeled as very stony land in Figure 7 of the Petition) shall be conducted to identify significant historic sites. A final report shall be submitted to the Department of Land and Natural Resources, State Preservation Division, for review and comments. If significant historic sites are identified, an acceptable mitigation plan shall be submitted to the Historic Preservation Division for approval and shall be implemented prior to any construction activities.”

**Response:** Mr. Aki Sinoto, an archaeologist engaged by Successor Petitioner, submitted to the Planning Commission, the Cultural Resources Commission of the County of Maui, and the Historic Preservation Division of the Department of Land and Natural Resources of the State of Hawaii (the “SHPD”), an archeological inventory survey report of the southern portion of the property which is covered with a’a lava. Though not required by Condition 14, Successor Petitioner also caused Mr. Aki Sinoto to prepare and submit to the Planning Commission, the Cultural Resources Commission and SHPD a supplemental archeological inventory report for the balance (and vast majority) of the property. These agencies have reviewed and commented on the reports. Mr. Aki Sinoto prepared a Cultural Resource Preservation Plan for various cultural sites in the property, which was submitted to the Cultural Resources Commission and SHPD for their review and approval. Mr. Sinoto is

now in the process of completing the Archaeological Inventory Survey (the "AIS") for the Honua'ula property. Said AIS will comply with the requirements stated in Condition #26 of Ordinance 3554.

**15. Condition #15 of the D&O states:**

"15. Petitioner shall provide at no cost to the County one (1) acre of land along Piilani Highway for a future fire station at a location satisfactory to the County."

**Response:** The Department of Fire Control of the County of Maui (the "Fire Department") informed Successor Petitioner that it no longer required a one (1) acre portion of the property for a future fire station. The Fire Department advised Successor Petitioner that the agency had instead secured another site for its future fire station. Construction of a fire station at the new site has now been completed. Successor Petitioner filed a petition to amend the District Boundary Amendment D&O proposing deletion of Condition 15 in its entirety due to the fact that the County and Department of Fire Control had already selected a site for the new facility. Letters supporting the Successor Petitioner's request were received from both the Departments of Fire Control and Planning. The Commission, in its Order Granting Petitioner's Motion to Amend the Decision and Order of Land Use District Boundary Amendment Docket No. A93-689, on January 21, 2003 approved the Successor Petitioner's request to delete Condition #15 in its entirety.

Condition #24 of Ordinance 3554 requires a donation by New Owner to the County for a two-acre site for the Fire Department within the Project along with a contribution of \$550,000 to the County for the development of a police station in South Maui.

**16. Condition #16 of the D&O states:**

"16. Petitioner shall develop the property in substantial compliance with the representations made to the Commission. Failure to develop the property may result in reversion of the property to its formal classification, or change to a more appropriate classification."

**Response:** New Owner intends to comply with Condition #16. Like the Successor Petitioner, New Owner will continue to fully advise the LUC of the differences between the Original Development and the Current Development. But as also noted above, the permitted uses between the Original Development and the Current Development remain the same, albeit the latter is reduced in its density from the former.

**17. Condition #17 of the D&O states:**

"17. Petitioner shall give notice to the Commission of any intent to sell, lease or sign place in trust or otherwise voluntarily the ownership interest in the property prior to development of the Property."

**Response:** New Owner intends to comply with Condition #17.

**18. Condition #18 of the D&O states:**

“18. Petitioner shall timely provide, without any prior notice, annual reports to the Commission, the Office of State Planning, and the County of Maui Planning Department in connection with the status of the subject project and petitioner’s progress in complying with the conditions imposed therein. The annual report shall be submitted in a form prescribed by the Executive Officer of the Commission.”

**Response:** New Owner submits this Seventeenth Annual Report in compliance with Condition #18.

New Owner is also required by Condition #29 of Ordinance 3554 to provide an annual report to the Department of Planning and the County Council.

**19. Condition #19 of the D&O states:**

“19. Petitioner shall record the conditions imposed herein by the Commission with the Bureau of Conveyances, pursuant to Section 15-15-92, Hawaii Administrative Rules.”

**Response:** Original Petitioner complied with Condition #19 by its recordation on January 20, 1995, of the document listing conditions to Reclassification of lands (the “Recorded Conditions”) with the Bureau of Conveyances of the State of Hawaii as Document No. 95-009365.

**20. Condition #20 of the D&O states:**

“20. Within seven (7) days of the issuance of the Commission’s Decision and Order for the subject reclassification, Petitioner shall (a) record with the Bureau of Conveyances a statement that the Property is subject to conditions imposed herein by the Land Use Commission and the reclassification of the property; and (b) shall file a copy of such recorded statement with the Commission.”

**Response:** Recorded conditions and the recorded copy thereof filed with the LUC by the Original Petitioner on February 13, 1995, fulfills Condition #20.

**21. Condition #21 of the D&O states:**

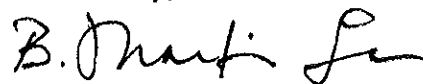

“21. The Commission may fully or partially release the conditions provided herein as to all or any portion of the Property upon timely motion and upon a provision of adequate assurance and satisfaction of these conditions by the Petitioner.”

Mr. Orlando Davidson  
March 10, 2011  
Page 15

**Response:** Pursuant to Successor Petitioner's motion and adequate assurance of the reason for deleting Conditions #10 and #15, the LUC deleted Conditions #10 and #15 at its meeting on January 21, 2003. A new Condition #10 was substituted as noted, above, but no new provision was inserted for Condition #15. Successor Petitioner intends to continue complying with Condition #21.

Should you have any questions about the matter contained in this annual report, please do not hesitate to contact me.

Sincerely,

B. Martin Luna
