Part 1: Project Summary

Phase V-B Construction and Operations
Construction of Phase V-B began on May 24, 2010 and was completed November 22, 2010. Operations moved into Phase V-B in December 2010 and are currently there.

Phase IV Gas Wells
The bid opening was held in November 2010 for installation of gas wells on Phase IV, designed by Cornerstone Environmental Group, L.L.C. with FY2010 capital improvement funds. Goodfellow Brothers, Inc. was awarded the contract and completed the work by end of June 2011. Although these wells are connected to the flare currently, they are included in the August 2011 advertisement for contractors to design, construct, and operate a landfill gas to energy (LFGTE) facility. Proposals for the LFGTE project are due to the County in November 2011.

Part 2: Project Compliance

Condition 1: That the Land Use Commission Special Permit shall be valid until October 31, 2018, subject to further time extensions by the Land Use Commission upon a timely request for extension filed at least one-hundred twenty (120) days prior to its expiration. The appropriate Commission shall make a recommendation to the Land Use Commission and may require a public hearing on the time extension.

Report: This condition was approved by Land Use Commission at the February 19, 2009 meeting when the request for the Third Amendment was under discussion. Accordingly, the permit remains valid for seven more years.

Condition 2: That the conditions of this State Land Use Commission Special use Permit shall be enforced pursuant to Sections 205-12 and 205-13, Hawaii Revised Statutes. Failure to comply with one or more of the conditions herein shall result in a notice of violation issued by the appropriate enforcement agency, notifying the permit holder of the violation and providing the permit holder no more than sixty (60) days to cure the violation. If the permit holder fails to cure the violation within sixty (60) days of said notice, the appropriate enforcement agency shall issue an order which may require one or more of the following: that the violative activity cease, that the violative development be removed; that a civil fine by paid not to exceed ONE THOUSAND AND NO/100 DOLLARS ($1,000) per violation; that a civil fine not to exceed FIVE THOUSAND AND NO/100 DOLLARS ($5,000.00) shall be issued if violation not cured within six months of the issuance of the order. The order shall become final thirty (30) days after the date of its mailing or hand-delivery unless written request for a hearing is mailed or delivered to the Planning Department within said thirty (30) days. Upon receipt of a request for a
hearing, the Planning Department shall specify a time and place for the permit holder to appear and be heard. The hearing shall be conducted by the Planning Director or the Director's designee in accordance with the provisions of Chapter 91, HRS, as amended.

**Report:** The County is complying with all conditions.

**Condition 3:** That the subject Land Use Commission Special Use Permit shall not be transferred without the prior written approval of the Land Use Commission. The appropriate Planning Commission shall make a recommendation to the Land Use Commission. However, in the event that a contested case hearing preceded issuance of said State Land Use Commission Special Use Permit, a public hearing shall be held by the appropriate Planning Commission upon due published notice, including actual written notice to the last known addresses of parties to said contested case and their counsel.

**Report:** No request for transfer has been made.

**Condition 4:** That full compliance with all applicable governmental requirements shall be rendered.

**Report:** The landfill is compliant with federal laws and state regulations which govern landfill operations and environmental monitoring with both groundwater sampling and analysis and landfill gas collection and flaring. NPDES permit rules are followed.

**Condition 5:** That the Applicant shall develop the Property in substantial compliance with the representations made to the Land Use Commission in obtaining the State Land Use Commission Special Use Permit. Failure to so develop the Property may result in the revocation of the permit.

**Report:** The Property has been developed as proposed to the Land Use Commission.

**Condition 6:** That the Applicant shall begin construction of the landfill expansion within 12 months from issuance of the Land Use Commission's decision and order dated May 13, 2002. Construction shall include any improvements necessary to the operation of the landfill pursuant to all applicable laws and regulations.

**Condition 7:** That the Applicant shall take appropriate mitigative measures to minimize erosion, and prevent cement products, oil, fuel, and other toxic substances associated with the use of heavy machinery from spilling or leaching into the ground.

**Report:** Landfill equipment is maintained regularly or sent out for repair when needed;
contractor equipment is in good operating condition with no leaking parts. A Spill Prevention and Containment Plan was written for the landfill by Ch2M-Hill in 2009.

Condition 8: That the Applicant shall comply with the Department of Health Ambient Air Quality Standards, Hawaii Administrative Rules, Title 11, Chapter 59 and Air Pollution Control, HAR 11-60.

Report: Landfill operations comply with air quality regulations. Dust is controlled by paved roadways around the landfill facility; dust from cover soil is controlled by the application of water from the water truck when the waste is covered at the day’s end.

Condition 9: That the Applicant shall comply with the EPA’s New Source Performance Standards.

Report: The County continues to monitor the gas wells and surface at the closed Phases I and II. Measurements are compiled in reports submitted to the Hawaii Dept. of Health, Clean Air Branch for review. A landfill gas collection system installed in the Phases I and II pipes to the flare in Phase IV where landfill gas emissions are ignited. Design and construction of a gas collection system for Phase IV was funded in FY10 for $2M. Cornerstone was selected in FY10 for its design; construction was bid in October 2010. Construction of the gas wells was completed by Goodfellow Bros. in June 2011.

Condition 10: That the Applicant shall immediately stop work and contact the State Historic Preservation Division, Department of Land and Natural Resources should any previously unidentified archaeological resources such as artifacts, shell, bone, charcoal deposits, human burial, rock or coral alignments, pavings or wall be encountered during development of the Special Use Permit area.

Report: No archaeological resources such as artifacts, shell, bone, charcoal deposits, human burial, rock or coral alignments have been discovered during any construction.

Condition 11: That provisions shall be enacted to ensure emergency access to the sanitary landfill in case of fire or any other disaster.

Report: Fire Dept. and Police Dept. have keys to the gate to enter the landfill anytime.

Condition 12: That the Applicant shall timely provide without any prior notice, annual reports to the Land Use Commission and the County of Maui Planning Department in connection with the status of the subject project and Applicant’s progress in complying with the conditions imposed herein. The annual report shall also include the capacity remaining in the landfill at the time of submission of the annual report. The annual report shall be submitted in a form prescribed the Executive Officer of the Land Use Commission.
Central Maui Landfill Expansion FY2011 LUC Annual Report for SP97-390
Page 4

Report: This fourteenth annual report is being submitted to meet this condition. With the completion of Phase V-B construction, the landfill has capacity to 2017.

Condition 13: That the Applicant shall utilize non-drinking water, to the extent possible, for grading, dust control, and irrigation of the landfill.

Report: The landfill recycles as much leachate as allowed for use in dust control.

Condition 14: That the Applicant shall reasonably ensure that windblown debris around the perimeter of the landfill, particularly within areas visible from the public right of way, are removed on a daily basis.

Report: Portable litter fences are installed near the working face to catch any litter from the trucks as they dump. The landfill uses a vacuum to collect litter from around the entrance facility while crews from Kalima O Maui manually pick up litter along Pulehu Rd. and the grounds not reached by the vacuum. A permanent, 30 ft. tall litter fence has been installed between Phases V-A and V-B and Pulehu Rd.

Condition 15: That full compliance with the requirements of the State’s Department of Health for sanitary landfill operation shall be rendered.

Report: Landfill operations are in compliance with the terms and conditions of Permit No. LF-0091-04 issued by the Department of Health and effective to February 2014.

Condition 16: That the Applicant shall clarify the entire acreage that is the subject of LUC Docket No. SP97-390 with the Maui Planning Commission and the LUC by filing an aerial photographic map with overlay and a site map clearly depicting the proper acreage of SP97-390.

Report: The maps were sent to the MPC and LUC.

Condition 17: That to the extent practicable, leachate generated at the landfill shall be returned to the landfill.

Report: In FY2011, quantities of leachate, in compliance with the operating permit, generated at the active area were applied to the working face for increased compaction and litter control. Due to heavy rainfall, excess quantities generated were disposed of at the wastewater treatment plant in Kahului.
