Aloha Luc-

I am writing this letter because I cannot make it to the hearing on Friday to discuss the proposed development at Olowalu. The proposed EIS would develop 1500 homes and a shopping plaza immediately upshore from one of Maui's premiere coral reefs. More lawns mean more fertilizer which has been shown to cause issues immediately offshore from other developments. The extra runoff from the road will infuse the reef with more tar, oil and automobile fluids. And the increased use will certainly impact the already stressed reef. In return, I fail to see any benefit to the reef from this proposed development. Please do not allow this development to move forward.

Jeffrey Milisen
