STATE LAND USE COMMISSION
November 9, 2016
Lanai City, Hawaii

RECEIVED
NOV 9 2016
STATE OF HAWAII
LAND USE COMMISSION

TESTIMONY OF THE ILWU LOCAL 142
ON DOCKET NO. A89-649
MINUTE ORDER NO. 7
PETITION OF LANAI RESORT PARTNERS

My name is Donna Domingo, and I am president of the ILWU Local 142, which represents more than 600 workers in collective bargaining on the island of Lanai.

The issue before the Land Use Commission is whether or not Condition #10 of the 1990 agreement between Lanai Company Inc., predecessor to Pulama Lanai, and the Lanaians for Sensible Growth and others was violated and resulted in the company using potable water from the high-level groundwater aquifer to irrigate the golf course instead of non-potable water (e.g., brackish water and reclaimed sewage effluent). If the Land Use Commission decides that the company violated the condition, the land use district boundary may revert back from its current urban designation to its former agricultural/rural designation.

ILWU members at the Manele golf course have told us that the water they use to irrigate the golf course is brackish and not suitable for human consumption. If the company was using potable water to keep the golf course green, knowing how limited water resources on Lanai are, the golf course workers would be up in arms. They live on Lanai too and, when it comes to water, they want to be sure that potable water is available first for the people of Lanai. The Land Use Commission decision is weighing heavily on them.

In fact, all of our members are concerned about a decision that could threaten their livelihood. Although only a few work at the golf course, all Four Seasons workers in Housekeeping, Engineering, Food & Beverage, the Front Office, and other departments are well aware that the golf course does not stand by itself. It is an amenity and an attraction for visitors to the island who stay at the resort and also patronize the restaurants, stores, and other businesses in Lanai City. In fact, the majority of Lanai residents understand that what affects the resort affects them all. Without jobs, there would be no economic activity—no one shopping at the stores or eating at the restaurants. People will move away from Lanai for work. Few will remain to support what could become an aging, dying town.

When we learned about this public hearing, the ILWU prepared an "Open Letter to the State Land Use Commission" to allow our members the opportunity to make their voices heard even if they could not attend the hearing today, either because they are working the day shift or are resting to be ready for the night shift. Some of the letters have even been signed by others who live on Lanai who are equally concerned about the future of their home island.

We present for the Commission's consideration more than 500 individually signed letters requesting that the Land Use Commission make a determination, once and for all, that the company is in compliance with Condition #10 and is using non-potable sources of water for golf course irrigation rather than potable water from the high-level groundwater aquifer. This decision will also reaffirm the continued land use district boundary at Manele as an urban district.

The ILWU urges a favorable decision, and we thank you for considering our testimony on this very important matter that ultimately affects the livelihood and well-being of all the people of Lanai.

OPEN LETTER TO THE STATE LAND USE COMMISSION

TO: The Honorable Edmund Aczon, Chair
and Members of the State of Hawaii Land Use Commission

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

OPEN LETTER TO THE STATE LAND USE COMMISSION

TO: The Honorable Edmund Aczon, Chair
and Members of the State of Hawaii Land Use Commission

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

OPEN LETTER TO THE STATE LAND USE COMMISSION

TO: The Honorable Edmund Aczon, Chair
and Members of the State of Hawaii Land Use Commission

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

OPEN LETTER TO THE STATE LAND USE COMMISSION

TO: The Honorable Edmund Aczon, Chair
and Members of the State of Hawaii Land Use Commission

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.

OPEN LETTER TO THE STATE LAND USE COMMISSION

TO: The Honorable Edmund Aczon, Chair
and Members of the State of Hawaii Land Use Commission

RE: Support for Water Use on the Island of Lanai,
Docket No. A89-649

We live and work on Lanai. Pulama Lanai and Four Seasons provide many quality jobs, including those at Manele Golf Course. Your decision could threaten our livelihood.

Lanai is a small island with few resources. Our limited resources cannot be squandered or misused. Water is important for our health and well-being.

But we need economic opportunity on Lanai. Water is also important to our jobs. Many of us rely on tourism. With the hotels, the golf courses, and other activities on Lanai, we are able to live and work on Lanai. Without tourism, many of us will need to move to another island—or even further away.

Pulama Lanai takes stewardship of Lanai's resources seriously, and the company has worked hard to comply with the conditions of the special use permit ever since coming to the island in 2012. Pulama Lanai workers have the same commitment to water stewardship, because our lives and livelihoods depend on it.

Lanai is our home. Please help us to continue to live and work here. Please do not reverse the land use classification to Agricultural and/or Rural. That may signal the end of tourism and jobs on Lanai.

Thank you for your commitment to what is fair and right.
