|                                     | Scenario 3       | Honoapiilani Highway/<br>Road J (Project South<br>Access) <sup>1</sup>         | - Provide a median refuge lane along Honoapiilani Highway for westbound left-turn vehicles.<br>- Northbound right-turn lane → Provide a new right-turn with at least a 100 feet of storage space<br>- Southbound left-turn lane → Provide a new left-turn with at least a 100 feet of storage space<br>- Westbound left-turn lane → Provide a new right-turn with at least a 100 feet of storage space |
| Future Year 2027<br>(With Project)  | Scenario 4       | Honoapiilani Highway/<br>Kapunakea Street                                      | - Consider restriping to provide exclusive eastbound left-turn lane and shared through/right-turn lane.                                                                                                                                                                                                                                                                                                |

Notes:

1. Right-turn and left-turn lane lengths show required minimum storage space only. Additional taper length and/or deceleration length to be provided/verified upon intersection design. Based on AASHTO Green Book, 425 feet is recommended to accommodate full deceleration length with a design speed of 50 mph.
