Thank you for the opportunity to review this project. We have the following comments to offer:

The mosquito is dominant in Hana and vector to many arboviruses. Any accumulation of tires, vehicles and any objects that will hold water serves as ideal breeding sources for mosquitoes. A comprehensive mosquito control program is needed for the Hana Landfill. If you have any questions, please contact Donald Taketa, Vector Control Supervisor, at 808 873-3560 or email him at [donald.taketa@doh.hawaii.gov](mailto:donald.taketa@doh.hawaii.gov).

Dear Mr. Taketa:

Thank you for your comment, copied in the attachment, on the need for a comprehensive mosquito control program for Hana Landfill, and please be advised that this email is the official response to your comment. Hana Landfill implements a comprehensive mosquito control program in its daily operations to eliminate water retaining objects. Scrap metal collection events are held periodically and the materials collected are promptly containerized and transported off-site to the appropriate recycling facilities. If you have any questions, please contact me at elaine.baker@mauicounty.gov or 808-270-7872. Elaine Baker, Civil Engineer

Re: DEPARTMENT OF ENVIRONMENTAL MANAGEMENT requesting a 30-year time extension on the State Land Use Commission Special Use Permit, County Special Use Permit, and Special Management Area Use Permit for the Hana Landfill Project at Walkoloa Road, TMK: 1-3-006:007 (por.) and 012, Hana, Island of Maui. (SP08-402, CUP 2007/0001) SM1 2007/0003)

Aloha Chair Duvauchelle & Commissioners,

The Hana Community Association is in full support of this 30-year time extension request for the Hana Landfill as referenced above.

The Hana Landfill is the only landfill in East Maui and is a necessity to our community, its businesses, residents and visitors.

The County has spent several million dollars in the past few years making improvements and bringing the landfill into compliance with the Department of Health.

Mahalo for your consideration.
