Commissioner

Please do not allow the 398 lot residential subdivision to go forward. There is currently a lot of development still underway within entire Waikoloa Village a large parcel adjacent to the affordable Kekumu condos which is supposedly marked for affordable home development and a large parcel across the street from there with lots for sale. All of this and another shopping center to be built and no roads to be built right out of the mouth of Tim Richards our council representative. Infrastructure before development, please. Public safety first.
