To Whom it May Concern,

Thank you for considering input from the public on the proposed Hokua Place development. As Kapaa residents we share the serious misgivings outlined in Ann Walton's recent letter to the TGI editor concerning this project. The project is not truly affordable for the vast majority of local families; the infrastructure is not in place to handle the water, sewage and waste disposal needs; and the devastating traffic impact is easy to imagine given its already critical state without the proposed additional development. This is not "smart growth" any way you look at it. The impact it will have on local residents and on families in need of affordable housing is nothing but detrimental.

Thank you for your consideration.

Sincerely,

Meg Schofield and Robert Woodcock
Kapaa
