Development

Daniel von Allmen, Manager, Project Development

Daniel von Allmen is a Manager, Project Development at Clearway Energy with ten years of experience in the renewable energy industry. For the last three years, he has helped to expand Clearway's utility and community solar businesses, managing almost 200 MW of projects from origination/acquisition through construction and is managing almost a gigawatt of solar and wind projects in various stages of development today.

Prior to working for Clearway/NRG, Dan worked on the project development team at SunEdison, helping to grow and execute on their market-leading portfolio of distributed generation projects in the northeast.

Dan also previously worked for several years at Sustainable Energy Advantage, a leading energy policy and market research consulting firm in New England.

Dan has an MA in Energy and Environmental Analysis from Boston University and a BA in Environmental Studies from Skidmore College.
