Aloha,

There are some basics:

The UH needs to follow state Land Use laws.

Please grant the petition for declaratory orders.

Please grant the Kanahaes' petition.

Please make sure that there is NO incremental degradation of public trust land.

I believe that 'conservation' the most appropriate designation for the summit area of Mauna Kea. There are 13 existing telescopes and now the TMT, bigger than all the rest is proposed to be built on untouched land, I do not agree with this in any way shape or form.

I hate the industrialization of the Mauna Kea summit. We do not need to study the skies any more! Our planet is in severe, serious trouble from what we humans have already done. We need to focus on saving life on Earth through caring for our home planet, all of her creatures and the land and the water.

Sincerely,

Mary Lu Kelley

Aloha to LUC

I am a descendant of a long line of genealogy to Kanaka Maoli who have honored Mauna Kea as a sacred place.

It is known of their practice of prayer to kuni akuaburial of human remains on Mauna Kea as well as placement of piko (umbilical cord)
