I am aware that this project has not been well planned and needs to stop progressing NOW. It is not affordable housing, As the developers would like you believe. Water meters for Kapaa area are not available in some lots...and this is over 700 lots. Traffic, as I know you are aware, will be so bad...that the visitors will find less congested areas to spend their time and money. There needs to be a solution to traffic congestion BEFORE these lots are approved.

Please STOP this project NOW and rethink the limited resources on this island.

Thank-You

Mira Walker..resident
