Aloha,

I do not want my kids walking on that highway after school. That is extremely dangerous!
Please listen to the outcry of parents and caring community members, and build a solution to this problem.

Subject: [EXTERNAL] Kihei High School

As a parent who's children will both be attending Kihei High School having them walk along the highway is unacceptable and very dangerous. Who is going to take responsibility when there is a death or more? Just go and look at the high schools when they get out of school. They are running across traffic and do not pay attention and do not consider the consequences of actions in a split second. This is sometimes even with a police officer helping. There has to be either and underpass or overpass. It is not the fault of the students or parents that this was not thought of before building. Why was this not the first part of the planning process? At this point you have to find another option either over or under. If not I would like the names of everyone who votes to keep them beside a highway because you will most likely be named later with deaths.

Thank you,
Nichole Johnson

The current walking area "on" the bridge is simply too narrow for scores of teenage students to use more than once a day, and, a horrific accident waiting to happen.

AND I AM OUTRAGED that not a single person from DOT has visited the site for the Kihei High School or met with the community. It's my understanding that the #2 person at DOT was born and raised on Maui but has declined invitations to visit. WHY????

This is important! This situation cannot be adequately addressed from afar. Hear the community. Get your feet on the ground here. Walk across the bridges and start using your heads!

As an active citizen who resides in central Kihei, has grandchildren who will likely attend Kihei High School, and as an architect and planner, I request that the requirement for an underpass or overpass across the Pi'ilani Highway be maintained for the safety of all students, teachers and users of the new high school. I do understand that the data being utilized to determine the need for such under or over pass is outdated. I request that new data reflecting current and proposed traffic conditions be procured and analyzed in order to properly evaluate the situation. This is not a condition to be taken lightly as it surely involves life and death at this dangerous location. Thank you for your dedication and serious consideration of this matter.

An underpass appears the only solution to this situation. Put yourself in the parents that have lost their kids lives on that bridge. You would have already built the underpass. If you think it's not necessary then you take your family and walk across it twice a day to understand how scary it is.
