Fred:

Please print up a large color rendering of the jpg map attached here. It should be big enough to either be glued on one of the cork boards or rolled up so that we can tape to the wall at the hearing. Please also make some (16) copies (8 1/2 x 11) for the commissioners with a staff report.

Tony,

Attached is a map and the planned stops for the site visit on Wednesday. The trip should take about 3 hours total (allowing 10 minutes at each stop). It would take too much time to visit all the archaeological sites on all the properties. Thus, the planned route takes the commissioners by several sites and to vantage points where the rest of the sites can be pointed out.

Please call me if you have any questions.

Jamie
