DECISION

THE PETITION

This matter arises from a Petition for an amendment to the Land Use Commission district boundary filed pursuant to Section 205-4 of the Hawaii Revised Statutes, as amended, and Part VI, Rule 6-1 of the Land Use Commission's Rules of Practice and Procedure and District Regulations by Harold Kun and Shirley Ann Chun who are requesting that the designation of the subject property be amended from the Agricultural to the Urban District. The requested change consists of property comprising approximately 1 acre of land, situated at Hilo, Island and County of Hawaii. The subject property is more particularly identified as Tax Map Key No. 2-3-39:38.

PURPOSE OF PETITION

Petitioners' stated purpose for requesting the reclassification of the subject property from Agricultural to Urban is so that Petitioners can subdivide the one-acre lot into an unspecified number of residential lots, ranging in size from approximately 7,500 to 10,000 square feet, which they intend to sell for \$22,000 to \$26,000 or at prevailing prices at the time of sale.

PROCEDURAL HISTORY

Initial Hearing:

The Petition was received by the Land Use Commission on May 29, 1981. Due notice of the hearing on this Petition was published on September 25, 1981, in The Honolulu Advertiser and in the Hawaii Tribune Herald. Notice of the hearing was also sent by certified mail to all parties involved herein on September 25, 1981. No timely application to intervene as a party or appear as a witness was received by the Land Use Commission.

The initial hearing on this Petition was held on October 27, 1981, in Hilo, Hawaii.

Harold and Shirley Ann Chun, the Petitioners herein, failed to appear at the hearing; the County of Hawaii was represented by County Planner, Norman Hayashi; and the Department of Planning and Economic Development was represented by Land Use Division Planner, Esther Ueda.

Due to the nonappearance of the Petitioners or their representative, the Hearing Officer announced that the hearing could not proceed, and there being no objections from any of the parties present, the hearing was continued to a future date to be announced at a later time.

Reopened Hearing:

Due notice of the reopened hearing on this Petition was published on February 10, 1982, in The Honolulu Advertiser and in the Hawaii Tribune Herald. Notice of the hearing was also sent by certified mail to all parties involved herein on February 9, 1982. No timely application to intervene as a party or appear as a witness was received by the Land Use Commission.

The reopened hearing was conducted in Hilo, Hawaii, on March 17, 1982.

Harold K. Chun, the Petitioner herein, was represented pro se; the County of Hawaii was represented by County Planner, Norman Hayashi; and the Department of Planning and Economic Development was represented by Esther Ueda.

The witnesses presented by the aforementioned parties were as follows:

Petitioner:

Harold K. Chun

County of Hawaii:

Norman Hayashi - County Planner

Department of Planning and Economic Development:

Esther Ueda - Land Use Division Planner

POSITION OF THE PARTIES

County of Hawaii - Approval.

Department of Planning and Economic Development - Approval.

APPLICABLE REGULATION

Standards for determining the establishment of an Urban District are found under Part II, Section 2-2(1) of the State Land Use Commission's District Regulations. Said regulation provides in pertinent part that:

- (1) "U" Urban District. In determining the boundaries for the "U" Urban District, the following standards shall be used:
 - (a) It shall include lands characterized by "city-like" concentrations of people, structures, streets, urban level of services and other related uses.
 - (b) It shall take into consideration the following specific factors:

1. Proximity to centers of trading and employment facilities except where the development would generate new centers of trading and employment.
 2. Substantiation of economic feasibility by the petitioner.
 3. Proximity to basic services such as sewers, water, sanitation, schools, parks, and police and fire protection.
 4. Sufficient reserve areas for urban growth in appropriate locations based on a ten (10) year projection.
- (c) Lands included shall be those with satisfactory topography and drainage and reasonably free from the danger of floods, tsunami and unstable soil conditions and other adverse environmental effects.
- (d) In determining urban growth for the next ten years, or in amending the boundary, lands contiguous with existing urban areas shall be given more consideration than non-contiguous lands, and particularly when indicated for future urban use on State or County General Plans.
- (e) It shall include lands in appropriate locations for new urban concentrations and shall give consideration to areas of urban growth as shown on the State and County General Plans.
- (f) Lands which do not conform to the above standard may be included within this District:
1. When surrounded by or adjacent to existing urban development; and
 2. Only when such lands represent a minor portion of this District.
- (g) It shall not include lands, the urbanization of which will contribute towards scattered spot urban development, necessitating unreasonable investment in public supportive services.
- (h) It may include lands with a general slope of 20% or more which do not provide open space amenities and/or scenic values if the Commission finds that such lands are undesirable and suitable for urban purposes and that official design and

construction controls are adequate to protect the public health, welfare and safety, and the public's interests in the aesthetic quality of the landscape.

FINDINGS OF FACT

The Panel of the Land Use Commission, after having duly considered the record in this docket, the testimony of the witnesses and the evidence adduced herein, makes the following findings of fact:

1. The subject property, owned in fee simple by the Petitioners herein, is located at Hilo, Island and County of Hawaii, and consists of approximately 1 acre, more particularly described as Tax Map Key No. 2-3-39:38. The subject property is located at Ponahawai, approximately 1 mile mauka of downtown Hilo, along the northeast border of Wiliwili Street. Lands surrounding the subject property consist of single-family residential type uses, and include the Crescent City Heights and the Kaumana Garden Subdivisions. Although it was formerly used for sugar cane production, the subject property is presently vacant and undeveloped. Vegetation on the one-acre parcel consists of california grass.

2. As reflected on the Land Use District Boundary Map H-66 (Hilo), the subject property is located within the State Land Use Agricultural District. The subject property is one of three one-acre parcels which form a pocket of Agricultural District lands within the Urban District in the area. With the exception of these three acres, all of the surrounding lands are within the State Land Use Urban District. Lands adjacent to, and to the east of the subject property were part of a previous petition before the State Land Use Commission (LUC Docket No. A79-462) filed by the

Komohana Investors, Inc., for the reclassification of approximately 212 acres from Agricultural to the Urban District for a residential subdivision. This petition was approved by the Land Use Commission on June 3, 1980.

3. The subject property is designated for Medium Density Urban Development on the Land Use Pattern Allocation Guide Map (LUPAG Map) component of the County of Hawaii General Plan. Such a designation allows for single-family residential uses at a maximum density of 5.8 units per acre. Although County zoning of the subject property is Agricultural 1-acre (A-1a), the Hilo Community Development Plan Zone Guide Map suggests that the subject property be rezoned to a Single Family Residential-10,000 square foot (RS-10) zoned district. The subject property does not lie within the Special Management Area (SMA).

4. The elevation of the subject property, running in a makai-mauka direction, ranges from 345 to 355 feet. The average slope of the subject property is about 3%. The subject area receives about 90 to 150 inches of rainfall annually. According to the Flood Insurance Study for the Island of Hawaii, prepared by the Federal Insurance Administration, most of the subject property is situated in an area of minimal flooding. However, a small portion of the subject property which is located along the northwest boundary of the parcel is within the Alenaio Stream flood plain.

5. The soils of the subject property have been classified as Hilo Silty Clay Loam, 0 to 10 percent slopes, (HoC) and Keaukaha extremely rocky muck, 6 to 20 percent slopes (rKFD) by the U.S.D.A. Soil Conservation Service, Soil Survey.

Hilo silty clay loam, 0 to 10 percent slopes (HoC) has a very strongly acid surface layer consisting of dark brown silty clay loam about 12 inches thick. The subsoil is strongly acid to medium acid and consists of dark-brown, dark reddish-brown, and very dark grayish-brown silty clay loam about 48 inches thick. Permeability is rapid, runoff is slow, and the erosion hazard is slight. This soil is used mostly for sugar cane. Small areas are used in truck crops, orchards, and pasture.

Keaukaha extremely rocky muck, 6 to 20 percent slopes (rKFD) has rock outcrops which occupy about 25 percent of the area. In a representative profile, surface layer is very dark brown muck about 8 inches thick. It is underlain by pahoehoe lava bedrock and is strongly acid. The soil above the lava is rapidly permeable. The pahoehoe lava is very slowly permeable but water moves rapidly through the cracks. Runoff is medium and erosion hazard is slight. Most of the soil is in native forest. Some areas are cleared and used for pasture.

6. According to the State Department of Agriculture's Agricultural Land of Importance to the State of Hawaii (ALISH) classification system, the subject property is classified "Prime Agricultural Land." Although the subject property and surrounding lands were formerly used for sugar cane production, since 1972, the subject property has not been used for agricultural purposes. The lands surrounding the subject property too, are no longer being used for agricultural purposes. The surrounding Urban designated lands are either being used for single-family residences or are proposed to be developed for use as such. The Soil Conservation Service has commented that they have no objections to

the proposed reclassification as the subject property is surrounded by Urban District lands either in or being proposed for urban uses. The Department of Agriculture, also, has commented that they have no objections to the proposed reclassification.

7. There are no known archaeological or historic features on the subject property. The Petitioners have represented that a reconnaissance type archaeological survey will be made on the land before actual development takes place. There are no known rare or endangered flora or fauna on the subject property.

8. The Petitioners intend to subdivide the subject property into an unspecified number of residential lots ranging in size from 7,500 to 10,000 square feet. Petitioners anticipate selling the lots for \$22,000 to \$26,000 per lot, or at prevailing prices at the time of sale. If sidewalks, curbs and gutters are required by the County of Hawaii for road improvements to Wiliwili Street, Petitioners intend to sell the lots at the estimated market value of \$40,000 to 43,000 per lot in order to raise the funds to construct these improvements. Petitioners maintain that if they are able to sell the lots, they will have the finances necessary to carry out their development plans. Petitioners intend to submit a rezoning application if their request for redistricting is approved. Subdivision and sales are expected to take place within one year of rezoning.

9. The reclassification of the subject property will not unreasonably burden public agencies to provide necessary urban amenities, services and facilities because:

a. Access - Wiliwili Street, which fronts the subject property, will provide the primary access to the proposed subdivision by way of Kaumana Drive. The right-of-way width of Wiliwili Street between Kaumana Drive and the subject property varies between thirty (30) and fifty (50) feet. The various right-of-way widths are due to improvements required of subdivisions created along Wiliwili Street. The right-of-way width fronting the subject property is 50 feet. Improvements within the roadway fronting the subject property include a 26-foot-wide pavement, and curb, gutter, and sidewalk on the mauka or opposite side. The shoulder of the roadway fronting the subject property is a 6-foot-wide, oil-treated surface.

b. Schools - The Department of Education has indicated that the proposed development will have a negligible impact on student enrollment and had no objections to the subject Petition.

c. Sewage - As there is no public sewerage system servicing the area, cesspools will have to be utilized for sewage disposal. The Department of Health has indicated that they have no objections to the proposed request at the present time.

d. Water - Water for the proposed development is available from a 6-inch waterline along Wiliwili Street. The Department of Water Supply has approved a water commitment for the proposed development until July 30, 1982.

e. Sanitation - As there is no government-operated disposal service, solid waste will have to be disposed of by commercial refuse collectors or each individual household will have to dispose of its waste at an approved waste site.

f. Drainage - Although the subject property is in an area that has experienced flooding in the past, completion of the Wailuku River flood control and diversion project now under construction and proposed drainage improvements by the Komohana Investors development should greatly alleviate the problem of flooding in the area.

The U.S.D.A., Soil Conservation Service stated that no major flooding or erosion problems are anticipated on the subject property.

10. Based on a review of the Petition, the evidence adduced at the hearing, and the provisions of Chapter 205, Hawaii Revised Statutes, the County of Hawaii and the Department of Planning and Economic Development have recommended that the reclassification of the subject property be approved.

CONCLUSIONS OF LAW

Reclassification of the subject property, consisting of approximately 1 acre of land, situated at Hilo, Island and County of Hawaii, from the Agricultural to the Urban District and an amendment to the district boundaries

accordingly is reasonable and non-violative of Section 205-2 of the Hawaii Revised Statutes.

ORDER

FOR GOOD CAUSE APPEARING, it is hereby ordered that the property which is the subject of the Petition in this Docket No. A81-510, consisting of approximately 1 acre, situated at Hilo, Island and County of Hawaii, identified as Tax Map Key No. 2-3-39:38, shall be and hereby is re-classified from Agricultural to Urban and the district boundaries are amended accordingly.

DONE at Honolulu, Hawaii, this 23rd day of July, 1982, per Motion on July 8, 1982.
