Subject: [EXTERNAL] Safe crossing for Kihei High School Students

SAFETY FIRST FOR STUDENTS AND ALL USING THE HIGHWAY

A 4 lane highway with a roundabout is ridiculous and dangerous for everyone... cars & people.
The only highway is already congested. To stop traffic for a roundabout will be a nightmare in all directions.
If there is an emergency and fire engines and police cars are needed, how will they navigate a roundabout and by pass traffic????

There is a traffic light there now. Have 2 crossing guards there and control the lights during the peak hours of students and cars arriving and departing.

THE SAFEST ACCESS IS AN OVER PASS WITH COVERED SIDES AND TOP. This way no objects can be thrown onto the highway. The overpass also gives high visibility to all those walking across it and doesn't interrupt traffic flow.

The next option is an underpass. However, that is less safe because there is no visibility. Students can be beaten up by a bully and no one will see it other than kids watching... Also less savory people can hide out in the underpasses. Also flooding is a serious problem....

I URGE AND PLEAD THAT THIS RIDICULOUS UNSAFE PLAN OF A ROUNDABOUT BE WITHDRAWN AND ABIDE BY THE SAFETY OF ALL CONCERNED....

Mahalo
