---

Hawaii State Use Commission,

I am writing you concerning the proposed development in Waiehu of 752 housing units. There is already a significant daily traffic problem on Kahekili hwy and Lower Beach rd. The addition of the proposed residential housing development will only make a bad situation worse. There is no reasonable plan in the draft DEA for mitigating the traffic impact that will create gridlock in Happy Valley and Wailuku.

The other concern is the lack of water available for this project. Adding a water storage tank as stated in the DEA will not solve the problem.

This project should not be approved and built until these issues can be properly addressed.

David Lengkeek
