Subject: [EXTERNAL] Safe Pedestrian Passage to new Kihel High School
Date: Wednesday, February 1, 2023 9:25:27 AM

Aloha,
Please maintain the LUC requirement for an over or underpass to the new school prior to opening for students!
Additionally, maintain the LUC requirement to provide safe pedestrian access parallel to the highway from the north and south.
It is not worth the loss or injury of one student of our community because of the negligence of the DOE since the requirements were put in place.
Underpasses are used throughout the United States even along rivers. We have an existing underpass that can be made safe and can be monitored. The students will use it even if it is not improved. This problem can be resolved quickly if there is vision and motivation.
It is wrong to postpone the fulfillment of the requirements, and it is dangerous to open the school without them in place.
Thank you for your service.
Mahalo,

Randy Wagner, Ala, LEED AP
