As a long time resident of the Kihei community I have been following the progress of the construction of the new high school, and the debate over the opening of the school.

I am writing to request that students be brought to the campus by bus until an overpass is built, which could add more years to the opening of classes.

It seems that this has become more of a political debate than progress.

I have been a Kihei resident for nearly 20 years. Please let's get the school up and running and help our kids make this important step toward their future!

Madeleine Kolodziej
Kihei resident since 2014
