Written testimony for DOE Status Update, 9:15am on 2/9/23

Aloha Planning Commission,

Setting up crossing lights for students to cross busy Pi'ilani Highway to get to Kulanihakoi High School at a roundabout, no less, is a setup for disaster! Student lives, horrendous traffic accidents, constant traffic snarls, drastically increased toxic emissions - nothing about this is okay in any way, shape, or form!

DOE and DOT know what the solution is - the one they agreed to a decade ago in getting permission to build mauka of the highway, which provides for over- or under-highway safe passage. Do not allow this plan to go forward!

Mahalo for holding the line against DOE's and DOT's egregious, callous disregard for life and for the entire community of Kihei which has made their united position clear again and again over all these years.

Mahalo for your consideration.

Madolin Wells, Kihei
