Aloha, I am writing in concern of this future development. With no the proposed 753 homes, that's two cars on per house hold minimum!!! How in Gods name do you expect kahikili Higswy to support all of this? Have you seen current traffic to get through happy valley or waiehu in the am. Minimum 20 minutes of CURRENT traffic. Before any of this is even discussed our current infrastructure needs to be assessed as it is maxed out already.

A full archaeological survey needs to be performed before any ground is broken.

Dig another well and drain more natural Resources? Dry out wai side like Lahaina? Let's burn down the rest of the island.....
