Land Use Commission, State of Hawai'i
235 S. Beretania Street, Suite 406
Honolulu, Hawai'i 96813

Re: Annual Report to the Land Use Commission - Hawaiian Memorial Life
Plan, Ltd.; LUC Docket No. A17-804

Dear Mr. Orodener:

Pursuant to Condition No. 20 of the Findings of Fact, Conclusions of Law, and Decision, and Order ("Decision and Order") of the Land Use Commission ("Commission") in the above-entitled docket, the Petitioner hereby submits the annual report for the year 2024, regarding the (1) status of the subject project ("Project"), and the (2) progress in complying with the conditions imposed herein.

1. General Progress of the Project

The Decision and Order for the above-entitled docket was entered on October 13, 2020. Grading work for an unpaved roadway to move equipment to the boring sites started in August 2022 and was completed in September 2022. Geotechnical borings were completed and the Geotechnical Engineering Exploration Report was completed on August 10, 2023.

An application for a grading permit that included Construction Plans, a Drainage and Retention Basin Analysis Report, Master Grading Permit Application and the Geotechnical Engineering Exploration Report was submitted to the City and County of Honolulu, Department of Planning and Permitting ("DPP") for review on August 11, 2023. Permit plan comments were provided over the following several months and plan revisions were completed to address comments and further the design based on minor revisions to the details of the site development over the following year. Revised permit plans were resubmitted on August 8, 2024. Plan review comments were

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Two (2)

addressed and if the plans were resubmitted in October 2024. Additional rounds of comments and resubmittals have occurred, and Petitioner is hoping for permit approval in early 2026.

Tree clearing was conducted at the Project site from April 14, 2025 through May 31, 2025. This work did not involve any ground disturbance, and no grading or grubbing was conducted. The tree cutting was followed by mulching that was scheduled for June 1, 2025 through July 31, 2025.

On July 16, 2025 Petitioner entered into a contract with Goodfellow Bros, LLC for the construction of the Project. The contract amount is \$45,685,500.00.

Based upon the United States Army Corps of Engineers ("USACE") rules regulating "waters of the United States," the Lipalu Channel would not be a jurisdictional waterway as confirmed by the USACE's May 10, 2021 Approved Jurisdictional Determination for the Project.

Monitoring of the seep commenced in September of 2021. Monitoring is ongoing and is being conducted pursuant to Condition 12.

On September 26, 2023, Petition sent a letter and memorandum to the Commission informing it that there have been no sightings of damselfly at the seep since January of 2023. There continues to be no sighting of damselfly up to the date of this annual report in 2025. Nevertheless, Petitioner is committed to following all requirements related to the seep and damselfly habitat.

Honua Consulting conducted onsite monitoring for the access road and geotechnical borings as part of the Data Recovery Plan. No significant findings were identified, and the fieldwork will be discussed in the Data Recovery Plan and detailed in the final Archaeological Monitoring Report.

The Preservation Plan and Data Recovery Report are substantially complete. Once the project team finalizes their internal review, both reports will be formally submitted to SHPD for review and acceptance. Temporary preservation measures were installed for previously identified archaeological sites and monitored during active

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Three (3)

fieldwork. All archaeological reports will be finalized upon the completion of the final site plan and integrated with the mitigation provisions.

The next major archaeological activity will take place during mass grading once the Project commences, when archaeological monitoring will continue to be conducted for all subsurface construction activities as the Project progresses, ensuring that all cultural or historic resources encountered are properly identified, documented, and treated in accordance with regulatory requirements and best practices.

The conservation easement was signed between the Hawaiian Islands Land Trust ("HILT") and Petitioner on June 30, 2022 and recorded at the Bureau of Conveyances, State of Hawaii on July 5, 2022.

On August 11, 2022, Petitioner and the Ko'olau Foundation signed the management agreement for the Cultural Preserve. Also on August 11, 2022, Petitioner, Service Corporation International and the Ko'olau Foundation signed the indemnification agreement to indemnify the Ko'olau Foundation in connection with the Cultural Preserve. On September 3, 2025, Petitioner and the Ko'olau Foundation signed a 10 year extension of the management agreement and the Foundation's acceptance of 3,000 trees for planting in the Ko'olaupoko District or any location of the Foundation's choosing.

2. Progress in Complying with Conditions Imposed

Condition No. 1:

"1. Representations Made. Petitioner shall take and complete the actions described, including but not limited to, those described in Findings of Fact Nos. 324-370 as represented to the Commission."

Status:

SCI Guaranty

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Four (4)

Service Corporation International ("SCI") has confirmed that the Project will begin construction upon receiving the necessary approvals in its letter dated May 1, 2020.

In its letter dated August 10, 2022, SCI confirmed that \$25,000,000.00 has been committed for the development, grading and infrastructure of Hawaiian Memorial Park, and includes the set aside of 100 interment spaces within the cultural preservation area for the benefit of the Ko'olaupoko Hawaiian Civic Club to use for traditional Hawaiian burial practices, as well as access to the cultural preservation area, and protecting and monitoring the endangered damselfly habitat.

SCI has also executed an indemnification agreement dated August 11, 2022, for the benefit of the Ko'olau Foundation in connection with the Cultural Preserve.

Rockfall Mitigation

Signage warning of rockfall at the entrance of the Cultural Preserve will be developed in cooperation with the Ko'olau Foundation, Ko'olaupoko Hawaiian Civic Club and the Hawaii Islands Land Trust at the time access to the Cultural Preserve is built. Access will be through the cemetery expansion area, so the timing will be coordinated with the cemetery development. The approximately 2,200 -foot rockfall catchment/drainage ditch and chain link fence to be located up slope of the cemetery expansion area will also be built in conjunction with the cemetery expansion construction.

NPDES Permit

The National Pollution Discharge Elimination System ("NPDES") permit was issued on July 6, 2021 for the unpaved roadway work. The NPDES NGPC permit for the work related to the construction of the Hawaiian Memorial Park Expansion was issued on January 10, 2025.

Noise Permit

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Five (5)

The grading contractor obtained a State Department of Health ("DOH") noise permit for the trail clearing grading work that was conducted to perform geotechnical borings. Another DOH noise permit will be obtained when mass grading commences.

Traffic

Austin, Tsutsumi and Associates, Inc. has completed the intersection improvement plans for the HMP Expansion for improvements at the existing HMP intersections with Kamehameha Highway. The improvements contained in the plans include striping improvements to allow two outbound lanes at the HMP side of the both the Mahinui Road and Halekou Road intersections. The two proposed lanes include a right turn lane and a shared through/left turn lane. Proposed work to include striping improvements only. Earth disturbing activities/grading are not proposed as part of these improvements, nor are repaving or expansion of any of the pavements at the intersections.

The intersection improvement plans were submitted to the State of Hawaii Department of Transportation-Highways Division for plan review on August 15, 2022, and approved on December 19, 2022, and the striping work was completed on August 2, 2023.

Archaeology

Honua Consulting has submitted its End of Fieldwork letter to SHPD dated March 11, 2022, for fieldwork conducted in accordance with the SHPD approved Data Recovery Plan. After the lab report is received and the SHPD response to the End of Fieldwork letter is received, Honua will then prepare the Data Recovery Report.

The Preservation Plan is at or near completion, and archaeological monitoring has been conducted with the geologic borings as a part of the Data Recovery Plan and will also be conducted when mass grading for the project commences.

Condition No. 2:

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Six (6)

"2. Buffer Areas. Petitioner shall establish a buffer between the proposed cemetery expansion, Pohai Nani project, and other adjacent residential properties in substantial compliance with representations made to the commission and contained in the Ko'olau Poko Sustainable Communities Plan."

Status:

The buffer areas have been established by the Conservation Easement where no burials use will be permitted to occur within the buffer areas.

Condition No. 3:

"3. Conservation Easement and Restrictive Covenant. Petitioner shall record with the State of Hawai'i Bureau of Conveyances or the State of Hawai'i Land Court, or both, as appropriate, a conservation easement and related declaration of restrictive covenant on the entirety of the 156.5-acre undeveloped portion of its Pikoilua Tract property (TMK No. 4-5-033: 001) that limits, in perpetuity, any other future development on the property, except for the 27.5-acre portion of the property that encompasses the proposed Hawaiian Memorial Park expansion site, and the 14.5-acre portion of the property that encompasses the proposed Kawa'ewa'e Heiau cultural preserve.

A copy of the recorded conservation easement and declaration of restrictive covenant shall be submitted to the City and County of Honolulu, Department of Planning and Permitting ("DPP"), prior to the issuance of any grading permit or any other permit which involves ground disturbance.

Should the Petitioner desire to make any major changes to the conservation easement or the declaration of restrictive covenant, a request to amend the Decision and Order shall be made to the LUC. The LUC shall be the ultimate arbiter of whether a proposed change is major.

Petitioner shall formulate the easement and stewardship of the easement with a Land Trust that is accredited and in good standing with the Land Trust Accreditation Commission for the long-term management of the area."

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Seven (7)

Status:

The Grant of Conservation Easement and Declaration of Restrictive Covenants was executed between Hawaiian Memorial Life Plan, Ltd., as Grantor, and Hawaiian Islands Land Trust dba Hawaii Land Trust, as Grantee, on June 30, 2022.

The Grant of Conservation Easement and Declaration of Restrictive Covenants was recorded at the State of Hawaii Bureau of Conveyances on July 5, 2022.

Condition No. 4:

"4. Landscape Plan and Tree Replacement. Prior to the issuance of a grading permit, the Petitioner shall submit to the DPP, a landscape plan and schedule of planting. In consideration for the potential impact of Climate Change, within the Petition Area, the loss of mature trees, defined as having a trunk diameter of six inches or greater, shall be replaced on a one-for-one basis, at a minimum, with preferably field stock trees that will have approximately similar size canopy coverage within a reasonable period of time. The locations of replacement trees are not limited to the Petition Area."

Status:

The Landscape Plan is in the process of being finalized for submittal to DPP. A conceptual landscape plan was submitted as part of the unpaved roadway work grading permit application.

The Hawaiian Memorial Park Cemetery Expansion Project Tree Replacement Plan was finalized and completed July 2022 after receiving comments on an earlier draft by the City DPP. The Tree Replacement Plan encompasses the Petition Area.

A topographic survey of the area needed for the design work and cemetery expansion was conducted in 2021. As part of the survey work, trees having trunk diameter greater than six inches were identified in the entire Petition Area. The survey identified 4711 trees with trunk diameter of more than six inches in the Petition Area,

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Eight (8)

which is comprised of 1,277 trees counted in the buffer area and 3,434 trees counted in the non-buffer area of the Petition Area. The final count of trees to be removed from the buffer area will be determined after design plans are completed identifying improvements within the buffer area.

Petitioner has begun implementation of the Tree Replacement Plan and has established a memorandum of understanding with the Ko'olau Foundation to accept 3,000 trees that will be replanted. Petitioner has also delivered 598 trees to Healthy Climate Communities for planting at Hamakua Marsh in Kailua.

Replacement tree species include, but are not limited to, 'Ohi'a lehua, Hala, Alahe'e, Kau, Neneleau, Milo, Koki'o ke'oke'o, Loulu, Lonomea, Kamani, Kukui, 'Ohi'a 'ai, Ulu, Noni, Orchid Tree, Monkeypod, Poinciana, Plumeria, Puakenikeni, Various Palms, and Shower Trees.

On September 3, 2025, Petitioner and the Ko'olau Foundation executed a 10 year extension of the management agreement which confirmed that the Foundation has accepted responsibility for 3,000 trees to be planted. 598 trees have been planted so far.

Condition No. 5:

"5. Detention Basin Analysis. The Petitioner shall prepare a detailed "Detention Basin Analysis", using appropriate computer modeling software, to determine the size of the detention basins to be constructed immediately upstream of each of the existing drainage inlets that will receive runoff from the project. The inflow will be calculated based on at least a 10-year, 24-hour rainfall event and the basins shall be designed so that the outflow from each basin will be limited to the capacity of the existing downstream drainage improvements. The Detention Basin Analysis shall be submitted to DPP for approval. After the Detention Basin Analysis is approved, the detention basins shall be constructed as soon as practical after the start of grading for the project."

Status:

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Nine (9)

The Detention Basin Analysis was completed and included as part of the Drainage Report that was submitted to DPP as part of the grading permit application package. Following the permit review process, DPP has offered comments to the report over the initial and subsequent submittals and the design engineers are working to address any comments/clarify information presented by the City.

Condition No. 6:

"6. Stormwater Management and Drainage Improvements. Notwithstanding other conditions related to the preservation of the habitat for the endangered Hawaiian damselfly, to the extent possible, Petitioners shall implement applicable BMPs to minimize infiltration and runoff from construction and vehicle operations, reduce or eliminate the potential for soil erosion and ground water pollution, and formulate dust control measures to be implemented during and after the development process in accordance with State Department of Health ("DOH") guidelines and City ordinances and rules.

Petitioner, shall at the start of construction, install erosion and sediment controls and retention/detention basins prior to the clearing and grubbing of the site."

Status:

An Erosion and Sedimentation Control Plan was designed as part of the Construction Documents for the HMP Expansion project and submitted to DPP for review. Following the review process, DPP has offered comments to the plan over the initial and subsequent submittals and the design engineers are working to address any comments/clarify information presented by the City.

. The erosion and sedimentation control improvements will be installed prior to the start of construction and adjusted as necessary during construction to minimize and/or eliminate soil erosion and water pollution to the extent possible as required by the City and County of Honolulu and the State Department of Health.

Although not required, erosion and sedimentation control measures were installed during tree-cutting operations in response to community concerns.

Condition No. 7:

"7. Air Quality Monitoring. Petitioners shall participate in an air quality monitoring program as required by the DOH."

Status:

It is anticipated that air quality monitoring may be required during mass grading. If so, Petitioner will perform air quality monitoring in accordance with State DOH rules and this condition.

Condition No. 8:

"8. Established Access and Gathering Rights Protected. Pursuant to Article XII, Section 7, of the Hawai'i State Constitution, Petitioner shall preserve any established gathering and access rights of Native Hawaiians who have customarily and traditionally used the Petition Area to exercise subsistence, cultural, gathering, and religious practice, or for access to other areas for such purposes."

Status:

Petitioner has preserved and will continue to preserve any established gathering and access rights of Native Hawaiians who have customarily and traditionally used the Petition Area to exercise subsistence, cultural, gathering, and religious practice, or for access to other areas for such purposes.

Condition No. 9:

"9. Previously Unidentified Burials and Archaeological/Historic Sites. In the event that historic resources, including human skeletal remains, are identified during construction activities, all work shall cease in the immediate vicinity of the find, the find shall be protected from additional disturbance, and State Department of Land and Natural Resources - State Historic Preservation Division ("SHPD") shall be contacted immediately. Without any limitation to any other condition found herein, if any burials or archaeological or historic sites are discovered during the course of construction of the

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Eleven (11)

Project, all construction activity in the vicinity of the discovery shall stop until the issuance of an archaeological clearance from the SHPD that mitigation measures have been implemented to its satisfaction."

Status:

Honua Consulting has been and will continue monitoring construction in accordance with the approved archaeological monitoring plan and this condition.

Condition No. 10:

"10. Relocation of Rocks. Petitioner shall consult with the Cultural Preserve manager to determine whether any of the rocks that were part of the historic features should be relocated to the cultural preserve after data recovery."

Status:

Petitioner will consult with the Ko'olau Foundation to determine whether any of the rocks that were part of the historic features should be relocated to the cultural preserve after data recovery.

Condition No. 11:

"11. Establishment of Cultural Preserve. Petitioner shall establish the Cultural Preserve in conjunction with an appropriate Native Hawaiian group (Group). The Petitioner shall work with the community and the Ko'olaupoko Hawaiian Civic Club in order to establish a preservation and management plan for the Cultural Preserve, in perpetuity. Petitioner shall also execute the agreement with the Ko'olaupoko Hawaiian Civic Club, in the event the Ko'olaupoko Hawaiian Civic Club does not execute the agreement, then with another local Native Hawaiian Organization, to manage and steward the Cultural Preserve that supports native Hawaiian cultural practices, containing all provisions consistent with the Petitioner's representations before any work involving ground disturbance occurs.

Mr. Daniel E. Orodener, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Twelve (12)

Petitioner shall pay for or otherwise assume financial responsibility for expenses associated with capital improvements within the preserve required to fulfill the conditions set forth by the Commission for all on-going maintenance of the preserve. Petitioner shall cover reasonable expenses incurred by the Group associated with the management of the preserve, including rockfall hazard mitigation and liability."

Status:

On August 11, 2022, Petitioner and the Ko'olau Foundation signed a management agreement for the Cultural Preserve, which was extended an additional 10 years on September 3, 2025. Petitioner will pay or perform all associated capital improvements and on-going maintenance for the preserve, as well as reasonable expenses as required by this condition. In addition, Petitioner, SCI and the Ko'olau Foundation executed an indemnification agreement dated August 11, 2022, whereby Petitioner and SCI agreed to indemnify the Ko'olau Foundation in connection with the Cultural Preserve. On March 26th 2024 HMP, Honua Consulting and members of the Ko'olau foundation walked the Cultural Preserve area and established a general area for the Hawaiian Burial Spaces and the trail access.

Improvements to the Cultural Preserve area that include a pathway to a limited number of culturally significant sites and wayfinding and informational signage are in the design process. Permit plans for improvements within the Cultural Preserve are anticipated to be submitted for City and County Department of Planning and Permitting review in early 2025. This work is being permitted outside of the development of the cemetery expansion area. Construction of the Cultural Preserve improvements will be completed with the cemetery expansion improvements but work for the Cultural Preserve improvements will not commence until a permit authorizing work is obtained from the City and County of Honolulu.

Condition No. 12:

- "12. Endangered Species. Petitioners shall undertake the following:
- a. A subsurface drainage system designed utilizing a herringbone configuration shall be implemented in the cemetery expansion area

planned for fill activities above the seep. The system shall be comprised of three subsurface drainage mainlines with smaller subdrains branching laterally from them. This system will help ensure water flow to the well and seep is maintained.

- b. A well monitoring gauge shall be installed inside the wall of the well, located upslope from the seep to monitor water levels prior to, during and after the project construction.
- c. Before earthmoving activities begin a minimum 50-meter buffer area above the seep where there will be no grading will be established, then a temporary water line shall be extended to the well from the cemetery's irrigation system. This irrigation line will serve as a short-term means of ensuring continued water flow to the seep. If the gauge indicates water levels have declined to levels potentially affecting the seep, water from the irrigation line to the well will be provided to stabilize water levels.
- d. Once earthmoving activities conclude, a permanent water line shall be extended to the well from the expanded cemetery's irrigation system. This irrigation line will serve as a long-term means of ensuring continued water flow to the seep. If the gauge indicates water levels have declined to levels potentially affecting the seep, water from the irrigation line to the well shall be provided to stabilize water levels.
- e. Small sticks upright and away from the edges of the waterlogged areas shall be placed along the seep to serve as molting safe zone for damselflies to avoid predation from crawling predators.
- f. Habitat boundaries currently shown in the Final Environmental Impact Statement (FEIS) shall be reviewed during project final design based upon more accurate data collected from a topographic survey, and consultation with the State Department of Land and Natural Resources, Division of Forestry and Wildlife ("DLNR-DOFAW") and U.S. Fish and Wildlife Service ("USFWS"). Habitat boundary shall be revised as appropriate. Fencing shall be constructed around the damselfly habitat boundary to protect the native damselfly from disturbance from feral pigs. Fencing shall consist of livestock panels appropriate to exclude pigs, with lower barbed strand to resist digging.
- g. Regular inspection of the seep shall occur to ensure the present flow of water is continued.

- h. Inspection of the seep shall be conducted at monthly intervals for one year prior to construction to establish baseline water flow conditions.
- i. Monitoring shall continue during construction, with the seep area inspected on a weekly basis to evaluate water flow in coordination with BMP (erosion control) measures.
- j. Once construction concludes, monitoring shall continue for six months to ensure continued water flow to the seep. Inspections shall occur weekly for the first three months, and every two weeks for the following three months.
- k. After the six-month monitoring period elapses, HMP staff shall conduct monthly water flow inspections.
- l. At any time, if water flow is documented to be outside of the range observed in the pre-construction monitoring phase, the temporary or permanent irrigation lines shall be used to provide supplemental water to the seep. Additional mitigation measures shall be determined through consultation between the contractor, design team, DLNR-DOFAW, USFWS and other specialists.
- m. Regular inspections of the seep (at intervals described in 12a-k) shall also include surveys to ensure that non-native fish, specifically poeciliid fish, are not present within this habitat area. If fish are observed, surveyors shall notify experienced biologists to ensure prompt identification, and USFWS and DLNR-DOFAW shall be consulted on what control measures can be implemented.
- n. Establish an education and outreach program to raise awareness of the existence of the blackline damselfly and habitat area on the property. The outreach shall include informing visitors to Hawaiian Memorial Park as well as members of the adjacent community. The program shall include information on restricted activities and other best practices to avoid and minimize adverse impacts to the habitat and the species."

Status:

12.a.: The herringbone drainage system has been revised based on guidance from the water resources engineer based on borings completed by the geotechnical engineer.

The modified system will be installed during the construction of the HMP Expansion improvements expected to start in the Spring of 2026.

12.b.: The well monitoring gauge was installed on September 15, 2021.

12.c.: The 50-meter buffer area above the seep has been established and the temporary water line was installed in August of 2022.

12.d.: A permanent water line will be installed as a part of the HMP Expansion construction improvements.

12.e.: Small sticks are being placed along the seep to aid in molting.

12.f.: The topographic survey has been completed. Engagement with DOFAW and USFWS to review damselfly habitat boundaries has been initiated via letters sent to both agencies in July 2023. Fencing will be constructed during mass grading in coordination with a Preservation Plan developed for the seep.

12.g.: Seep inspection and monitoring started in September of 2021 and will continue until commencement of mass grading. This monitoring work involves monitoring of water level in the dug well, seep waterflow, the presence of fish in the seep, and rainfall.

12.h.: Monitoring of the seep was conducted monthly during the one year period from Sept 2021 – Aug 2022, which was prior to the start of clearing/grading of the Project's geotechnical access trail. Seep waterflow conditions prior to construction were documented and assessed.

12.i.: Monitoring was conducted weekly during clearing/grading of the Project's geotechnical access trail. Monitoring will also be conducted weekly during mass grading.

12.j.: Monitoring will be weekly three months after construction concludes and then every two weeks for the following three months.

12.k.: After the six month period following construction, monitoring will be conducted monthly.

12.l.: Seep waterflow was monitored during clearing/grading of the geotechnical access trail in consultation with the design team to determine if provision of supplemental water was required. Provision of supplemental water was not required during that phase of project construction. Supplemental water will be provided as required during mass grading.

12.m.: Monitoring includes surveying for fish. To date, no fish have been observed.

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Sixteen (16)

12.n.: An education and outreach program regarding the damselfly has been incorporated into the HMPFacts.com website. The preservation plan developed for the seep will include more information on an education program.

Condition No. 13:

"13. Hawaiian Hoary Bat. To avoid potential impacts to the Hawaiian hoary bat, the clearing of dense vegetation, including woody plants greater than 15 feet, along the periphery of the Petition Area shall not occur between June 1 to September 15 when bats may be carrying young and potentially could be at risk by such clearing activities."

Status:

Petitioner will comply. Tree cutting for the trail clearing grading needed for the exploratory borings was conducted in April of 2022. The contractor has been instructed that woody vegetation greater than 15 ft. may not be cut down from June 1 to September 15.

Condition No. 14:

"14. Disposal of Waste Material. Petitioner shall not dispose as waste material any clean fill at the PVT Land Company, Ltd. or any other construction and demolition landfill commercially in operation on the island of O'ahu as a result of grading work in the Petition Area.

Clean Fill is defined as "natural materials consisting of soil, clay, sand, volcanic cinder and ash, rock, and boulders measuring twelve inches or less in diameter; or a mixture or combination of such materials, which are not suspected to contain hazardous substances or concentrations of chemical contaminants of concern above the DOH's Tier I Environmental Action Levels."

Status:

Mr. Daniel E. Orodener, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Seventeen (17)

Petitioner will not be disposing of any Clean Fill at the PVT Land Company, Ltd. or any other construction and demolition landfill commercially in operation on the island of Oahu as a result of grading work in the Petition Area.

Condition No. 15:

"15. Community Outreach. Petitioner shall establish an ongoing construction-related community outreach program to inform area residents and businesses of construction milestones and activities occurring on the property. In addition, the Petitioner shall establish a hotline and a dedicated email address to for immediate and prompt responses to questions, concerns or comments from the community and other stakeholders."

Status:

HMPFacts.com is Petitioner's website established to facilitate ongoing community outreach. It has been active since 2017. In 2021, the website was updated to include the community outreach required by this Condition 15.

In March 2022, 1,800 letters were sent to area residents informing them of the website and that the website will contain information relating to construction, the damselfly, historic and cultural sites and project information.

The most recent construction information on HMPfacts.com was posted on August 21, 2022. The posting provided that (i) permits for geotechnical testing operations and trail clearing were obtained from the Department of Planning and Permitting, (ii) heavy equipment will be utilized to work through the trail and utilize the fell trees as part of our required erosion control and mitigation plan, and (iii) there may be areas where the trail will widen, particularly in and around the areas where the actual drilling will take place. The time frame associated with this work will begin in late August and will continue through the end of the year (2022).

HMPfacts.com also includes information relating to the damselfly. The website has a page dedicated to the damselfly and informs the community that the rare and endangered damselfly was identified on a lower section of Hawaiian Memorial Park's

undeveloped property, and that the damselfly habitat is outside of the proposed cemetery development.

Damselfly history is provided in the website to educate the public on background and unique qualities of the damselfly including the following: "Native Hawaiian damselflies are a remarkable cluster of 25 species diversified from a single waif arriving in Hawai'i long ago to occupy many aquatic niches and rain holding lily and 'ie'ie leaves. The Blackline Damselfly or Rainbow-Eye Damselfly, *Pinao Ānuenue*, (*Megalagrion nigrohamatum nigrolineatum*), ranges on O'ahu from sea level to 2,400 feet. Most remarkable are their luminous, compound eyes in colors from lime to turquoise to red, this rainbow-eye damselfly is visually striking but very hard to notice. These large, wrap-around eyes give panoramic vision to easily detect and catch flying prey. The brown, 2-inch-long damselfly nymphs (babies) favor a concealed existence clinging under stones or hiding in algae masses, both in moving and quiet waters, for long intervals."

A description of the efforts to preserve the damselfly are also discussed on the website and provides the following: "Since the recent discovery of a small, relict, lowland population of *Pinao Ānuenue* on an undeveloped portion of HMP's property, the small population is being monitored and protected by several activities supported by HMP to help them remain safe. The native damselflies observed on HMP's property are seen only along a slow moving seep of water that includes an abandoned well, likely dug before 1930 during the area's use as a dairy farm. The area of HMP's property where the native damselfly are observed is outside the portion of the property where cemetery expansion improvements would occur. This area would be preserved, and a management plan will be developed to support its continued presence."

The website also provides damselfly best practices to help the public care for the damselfly with the following information:

"Best management practices that would be followed to ensure the safety of the native damselfly and preserve its habitat are listed below:
NOT releasing aquarium fish, Jackson's chameleons, or chickens which eat nymphs or adults.

Mr. Daniel E. Orodener, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Nineteen (19)

NOT uprooting nearby plants or moving stones along the seep that provide shade or hold soil.

NOT removing kalo along the seep, which provide safe perches for emerging young.

NOT planting vegetation at the water's edge where an emerging young native damselfly may climb for molting to adults and be vulnerable to predatory ants.

NOT placing trash on the ground that can cover or divert water.

DO NOT ACCESS – No Trespassing – Hawaiian Memorial Park ("HMP") is Private Property and has "No Trespassing signs posted along with motion detection cameras. No one is permitted on HMP land without written permission from Hawaiian Memorial Park Management."

The website also has a telephone hotline and dedicated email address where the public can make inquiries to obtain information.

The Project's website (hmpfacts.com) has been updated regularly to provide Project updates for the community. On April 11, 2025 the website was updated to inform the community that tree clearing activities would be conducted from April 14, 2025 through May 31, 2025. On May 19, 2025, the website was updated with information about the upcoming mulching activities from June 1, 2025 through July 31, 2025.

On June 19, 2025, Petitioner gave a presentation to the Kaneohe Neighborhood Board No. 30 to give the community an update of the Project's progress, status and upcoming events.

In June of 2025, approximately 2,500 letters were sent to Pikoiloa neighbors to inform the community about the latest HMP activities. The letter provided links to the Project's website and facebook page, as well as information relating to recent tree cutting operations, and general Project progress.

Condition No. 16:

"16. Development Timetable. Petitioner shall provide the Commission with a

development timetable prior to obtaining grading permits from the City.”

Status:

Condition No. 17:

“17. Infrastructure Deadline. Petitioners shall complete construction of the proposed backbone infrastructure, which consists of the primary roadways and access points, internal roadways, on- and offsite water and electrical system improvements,

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai`i
October 13, 2025
Page Twenty-one (21)

and stormwater/drainage and other utility system improvements, within ten (10) years from the date of the Decision and Order approving the Petition.”

Status:

Petitioner anticipates completion of infrastructure by the end of 2027, within the ten (10) year infrastructure deadline of October 13, 2030.

Condition No. 18:

“18. Compliance with Representations. Petitioner shall develop the Petition Area in substantial compliance with the representations made to the Commission as reflected in the Findings of Fact, Conclusions of Law, and Decision and Order. Absent substantial commencement of use of the land in accordance with such representations, the Commission shall issue and serve upon the party bound by the condition and order to show cause why the property should not revert to its former land use classification or be changed to a more appropriate classification.”

Status:

Petitioner has substantially commenced developing the Petition Area in substantial compliance with the representations made to the Commission as reflected in the Findings of Fact, Conclusions of Law, and Decision and Order.

“19. Notice of Change in Ownership. Petitioner shall give notice to the Commission of any intent to sell, lease, assign, place in trust, or otherwise voluntarily alter the ownership interests in the Property, prior to development of the Property.”

Status:

Petitioner has no intent to sell, lease, assign, place in trust, or otherwise voluntarily alter the ownership interests in the Property prior to development of the Property. Development of the Property has substantially commenced and is expected to be complete by the end 2027.

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Twenty-two (22)

"20. Annual Reports. Petitioner shall timely provide without any prior notice, annual reports to the Commission, the Office of Planning, and the Department of Planning and Permitting in connection with the status of the subject project and Petitioner's progress in complying with the conditions imposed herein. The annual report shall be submitted in a form prescribed by the Executive Officer of the Commission."

Status:

Petitioner has provided its annual reports dated October 13, 2021, October 13, 2022, October 13, 2023, and October 11, 2024.

"21. Release of Conditions. The Commission may fully or partially release the conditions provided herein as to all or any portion of the Property upon timely motion and upon the provision of adequate assurance of satisfaction of these conditions by Petitioner."

Status:

Petitioner acknowledges this condition.

"22. Notice of Imposition of Conditions. Within seven (7) days of the issuance of the Commission's Decision and Order for the subject reclassification, Petitioner shall: (a) record with the Bureau of Conveyances or the State of Hawai'i Land Court, or both, as appropriate, a statement that the Property is subject to conditions imposed herein by the Land Use Commission in the reclassification of the Property; and (b) shall file a copy of such recorded statement with the Commission."

Status:

Petitioner has satisfied this condition by recording the Notice of Imposition of Conditions, identified as Document No. A-75980682, with the Bureau of Conveyances on October 20, 2020.

Mr. Daniel E. Orodenker, Executive Officer
Land Use Commission, State of Hawai'i
October 13, 2025
Page Twenty-three (23)

"23. Recordation of Conditions. Petitioner shall record the conditions imposed herein by the Commission with the Bureau of Conveyances or the State of Hawai'i Land Court, or both, as appropriate, pursuant to section 15-15-92 Hawai'i Administrative Rules.

This Declaration of Conditions shall supersede the Notice of Imposition of Conditions by the Land Use Commission dated October 14, 2020 upon the recordation at the Bureau of Conveyances of this Declaration of Conditions."

Status:

Petitioner has satisfied this condition by recording the Declaration of Conditions, identified as Document No. A-76460491, with the Bureau of Conveyances on December 7, 2020.

Please do not hesitate to contact the undersigned should you have any questions or comments with respect to the matters discussed above.

Very truly yours,
